(1) On June 29, 2018, Telefónica Móviles Chile S.A. sold 37 towers to Telxius Torres Chile S.A. generating an account receivable in the amount of ThCh$ 3,346,280, which was fully paid in August.
(2) Corresponds to interest paid on bonds and loans as of September 30, 2018 and 2017. See note 16.

The accompanying notes 1 to 30 form an integral part of these consolidated financial statements

1. Corporate information:

Telefónica Móviles Chile S.A. (formerly Inversiones Telefónica Móviles Holding S.A., (hereinafter “the Company”), was established as a limited liability company on July 12, 2004. On December 30, 2011 the partners agreed to change it to a closely held company. The Company’s capital is divided into 10 billion common, single series registered shares, without par value, which have been fully subscribed and paid. The Company’s line of business is: i) operating the public telephone service concessions which it May come to hold by virtue of Supreme Decrees issued by the Ministry of Transportation and Telecommunications; ii) performing all types of activities in the field of telecommunications services (fixed and mobile), comprising the installation, operation, exploitation and management, in general, of all types of networks, systems and services; iii) purchasing and selling all types of articles and products in the communications area; iv) offering data processing services to third parties; v) performing research and development activities in the telecommunications and telematics fields; vi) investing in tangible and tangible personal property, in shares of public companies, rights in other companies, bonds, commercial papers and other transferable securities, as well as their administration and operation. The Company is located at Avenida Providencia No. 111, Santiago, Chile.

At the Extraordinary Shareholders’ Meeting of Inversiones Telefónica Móviles Holding S.A. held on March 22, 2017, the shareholders approved the merger by absorption of subsidiary Telefónica Móviles Chile S.A., subject to the condition that the Company is to be registered in the Securities Registry of the Superintendency of Securities and Insurance. The registration process was completed on May 2, 2017 and the Company was incorporated to the Securities Registry under Number 1145. This merger did not generate financial effects except for those described in Note 11c.

At the same Extraordinary Shareholders’ Meeting held on March 22, 2017 the shareholders approved changing the Company’s name from Inversiones Telefónica Móviles Holding S.A. to Telefónica Móviles Chile S.A., as well as the wording of the new bylaws which as of the date of these financial statements are in force.

Telefónica Móviles Chile S.A. forms part of the Telefónica Group, and its majority shareholders are indirect subsidiaries of Telefónica S.A., whose activities are headquartered in Spain.

The subsidiary registered in the Securities Registry is:

Subsidiary	**Taxpayer No.**	**Registration No.**	**Participation percentage (direct and indirect)**	
			09.30.2018	**12.31.2017**
			%	**%**
Telefónica Chile S.A.	90.635.000-9	009	99.1405597	99.0281653

2. Significant accounting principles:

a) Accounting period

The interim consolidated financial statements (hereinafter, the “financial statements”) cover the following periods: Interim Consolidated Statements of Financial Position, ended as of September 30, 2018 and December 31, 2017; Interim Consolidated Comprehensive Income Statements for the three and nine-month periods ended as of September 30, 2018 and 2017 and the corresponding Interim Statement of Changes in Equity, and interim Statements of Cash Flows for the nine-month periods ended as of September 30, 2018 and 2017.

b) Basis of presentation

The consolidated financial statements for December 31, 2017 and their corresponding notes are shown in a comparative manner in accordance with Note 2a). Certain minor reclassifications have been made for comparison purposes to the 2017 financial statements.

c) Basis of preparation

The consolidated financial statements as of September 30, 2018, and December 31, 2017, and the comprehensive income statements, statements of changes in equity and statements of cash flows ended as of September 30, 2018 and 2017 have been prepared in accordance with International Accounting Standard 34 (IAS 34) “Interim Financial Reporting", incorporated in International Financial Reporting Standards.

The figures included in these consolidated financial statements are expressed in thousands of Chilean pesos, since the Chilean peso is the Company’s functional and reporting currency. All values are rounded to the nearest thousands, except when otherwise indicated.

The Company's Board of Directors is responsible for the information contained in these consolidated financial statements, and it expressly manifests its responsibility for the consistent and reliable nature of the application of IFRS.

d) Exchange Method

Balances of monetary assets and liabilities denominated in foreign currency are presented valued at the closing exchange rate for each exercise. Foreign currency translation differences arising from the application of this standard are recognized in income for the period through the “Foreign currency translation differences account and differences resulting from valuation of the UF are recognize in income for the period in the “income from indexation units” account.

Non-monetary items in foreign currency, which are measured in terms of historical cost, are converted using the exchange rate on the transaction date and non-monetary items that are measured at fair value in a foreign currency, are converted using the exchange rates for the date on which this fair value is measured.

When a loss or profit derived from a non-monetary item is recognized in other comprehensive income, any foreign currency translation difference included in that loss or profit, is also recognized in other comprehensive income. On the other hand, when the loss or profit, derived from a non-monetary item, is recognized in income for the period, any foreign currency translation difference, included in this loss or profit, will also be recognized in income for the exercise.

2. Significant accounting principles:

d) Exchange Method, continued

Assets and liabilities in US$ (United States dollars), Euros, Brazilian Real and UF (Unidades de Fomento), have been converted to Chilean pesos at the observed exchange rates as of the closing date of each period, detailed as follows:

DATE	USD	EURO	REAL	UF
09-30-2018	660.42	767.22	164.41	27,357.45
12.31.2017	614.75	739.15	185.64	26,798.14
09-30-2017	637.93	752.99	201.67	26,656.79

e) Basis of consolidation

The consolidated financial statements comprise the financial statements of the parent company and its subsidiaries (hereinafter, "the Company"), including assets, liabilities, income, expenses and cash flows after making adjustments and eliminations related to transactions between the companies that are part of the consolidation. Minority investments have been recognized under "Non-controlling Interests" (note 22e).

Control is achieved when the Company is exposed to or has rights to variable returns from its interest in the investee and has the capacity to influence these returns through its power over it. In order to comply with the definition of control the following points must be fulfilled:

- Power over the investee (i.e. existing rights that give it the capacity to direct the relevant activities of the investee).
- Exposure, or right to variable returns from its interest in the investee; and
- Capacity to use its power over the investee to influence the amount of the returns of the investor.

The financial statements of the consolidated companies cover the periods ended on the same dates as the individual financial statements of the parent Company, Telefónica Móviles Chile S.A. and have been prepared using the same accounting policies.

Non-controlling interest represents the portion of net income or loss and net assets of certain subsidiaries that are not owned by the parent company, and are presented in the consolidated statements of income and equity, separately from shareholders' equity.

The following subsidiaries are included in consolidation:

Taxpayer No.	Company Name	Origin Country	Currency	% of participation 09.30.2018			12.31.2017
				Direct	Indirect	Total	Total
96.990.810-7	Telefónica Móviles Soluciones y Aplicaciones S.A.	Chile	CLP	99.9999996	-	99.9999996	99.9999996

2. Significant accounting principles, continued

f) Financial assets and liabilities

1. Financial assets other than derivatives

Classification and presentation

The Company classifies its financial assets into the following categories: loans and accounts receivable, financial assets at fair value through profit and loss, financial assets held to maturity and assets-held-for-sale. The classification depends on the purpose for which the financial assets were acquired. The Company determines the classification of its financial assets at the time of initial recognition.

i) Amortized cost

Financial assets that comply with the following two conditions will be measured at amortized cost: the objective of the business model supporting them is to hold the financial assets to obtain contractual cash flows and in turn, the contractual conditions of the financial assets lead to cash flows composed of principal and interest payments only on specific dates.

The Company's financial assets that comply with the conditions established in IFRS 9, for valuation at amortized cost are: accounts receivable, loans and cash and cash equivalents.

Trade receivables are recognized for the amount of the invoice, and an adjustment is recorded if there is objective evidence of customer payment risk.

The estimated impairment of accounts receivable, is determined on the basis of the expected loss throughout the lives of the assets, determined by assessing the historical payment behavior and current information demonstrating the present and future condition of customers from the various segments that compose the portfolio. Recoverability matrices are prepared for this assessment, composed of aging periods, which provide the percentages of uncollectible based on past behavior, in addition to gathering timely customer information and monitoring changes in macroeconomic factors, thus recognizing impairment which are from inception.

Loans and accounts receivable are included in "Trade and other accounts receivable" in the consolidated statement of financial position, except for those with due dates in excess of 12 months from the closing date which are classified as Non-current trade and other accounts receivable. They are recorded at amortized cost using the effective interest rate method, which is its initial fair value.

The effective interest rate method is a method for calculating the amortized cost of a financial asset or liability and imputing finance income or expenses throughout the relevant period. The effective interest rate is the discount rate that exactly matches the estimated cash flows receivable or payable throughout the expected life of the financial instrument (or, when adequate in a shorter period) with the net carrying amount of the financial asset or liability.

Short-term trade receivables are not discounted. The Company has determined no difference between the amount invoiced and the amortized cost, as the transaction has no significant associated costs.

2. Significant accounting principles, continued

f) Financial assets and liabilities, continued

1. Financial assets other than derivatives, continued

Classification and presentation, continued

Cash and cash equivalents recognized in the financial statements includes cash balances, checking accounts, time deposits and investments in instruments with original maturity of ninety days or less. These items are recorded at their historical cost, which does not significantly differ from their realization value.

There are no restrictions on the use of cash and cash equivalents contained in this heading.

ii) Financial assets at fair value though other comprehensive income

Financial assets that comply with the following two conditions are measured at fair value through other comprehensive income: they are classified within a business model whose objective is to hold financial assets both to collect contractual cash flows and to sell them and in turn, contractual conditions lead to payment of principal and interest on the amount of the outstanding principal.

The Company will apply this valuation to factoring transactions, as long as the following conditions are met by sales subject to this transaction: significant, frequent sales, not motivated by credit risk and far from their due date.

iii) Financial assets at fair value through profit or loss

Financial assets will be considered in this category when they are not classified in the two previous categories or are irrevocably designated at their initial recognition at fair value through profit or loss.

They are recorded in the statement of financial position at fair value, and changes in their value are recorded directly in income when they occur, as are the costs of the initial transaction.

2. Financial liabilities

The Company irrevocably determines the classification of its financial liabilities at the time of their initial recognition.

Financial liabilities are initially recognized at fair value and in the case of loans, include costs directly attributable to the transaction. Subsequent measurement of financial liabilities depends on their classification: amortized cost, fair value through profit or loss or held for trading.

Financial liabilities are derecognized when the obligation is cancelled, liquidated or expires. When an existing financial liability is replaced by another from the same lender under substantially different terms, or the terms of an existing liability are substantially modified, that exchange or modification is treated as an accounting derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the income statement.

2. Significant accounting principles, continued

f) Financial assets and liabilities, continued

2. Financial liabilities, continued

i) Financial liabilities at amortized cost

The Company classifies all its financial liabilities at amortized cost, except for liabilities held for trading or that decrease an accounting asymmetry, which are valued at fair value through profit or loss.

ii) Financial liabilities at fair value through profit or loss

Financial liabilities are classified in the category of financial liabilities at fair value through profit or loss when they are initially recognized at fair value through profit or loss, in order to reduce accounting asymmetries.

This classification includes derivatives designated as effective hedging instruments (see note 18).

iii) Financial liabilities held for trading

Financial liabilities are classified as held for trading if they are acquired for the purpose of selling them in the short-term.

Profits or losses on liabilities held for trading are recognized with a charge or credit to comprehensive income. This category includes derivative instruments not designated for hedge accounting and also considers embedded derivatives.

3. Derivative financial instruments

The Company holds hedge derivatives to manage its exposure to interest and/or exchange rate risks (see Note 18.2) to manage its risks associated to changes in interest rate and exchange rate. The Company's objective in respect to derivatives is to minimize these risks using the most effective method to eliminate or reduce the impact on underlying hedged transactions.

Derivative instruments are recognized at fair value on the date of the statement of financial position under “Other financial assets” or “Other financial liabilities” depending on whether their fair value is positive or negative respectively. They are classified as current or non-current depending on whether they mature in less than or more than twelve months. Derivative instruments that meet all the requirements for being treated as hedge instruments for long-term items are presented as non-current assets or liabilities, based on their balance separately from the hedged items, as indicated in IAS 9.

Hedges for risks of variations, in exchange rates, in firmly committed transactions, May be treated indistinctly as either a fair value hedge or cash flow hedge.

2. Significant accounting principles, continued

f) Financial assets and liabilities, continued

3. Derivative financial instruments, continued

Variations in the fair value of derivatives that have been designated as and meet the requirements for being treated as fair value hedge instruments, are recorded in the comprehensive income statement netting the effects of the part of the underlying for which the risk is being hedged.

In the case of cash flow hedges, changes in the fair value of derivatives are recorded, for the effective part of those hedges, in an equity reserve called “Cash flow hedge reserve”. The accumulated deficit or profit in that heading is transferred to the comprehensive statement of income to the extent that the underlying has an impact on the comprehensive income statement for the hedged risk, netting that effect. The part of the hedge considered to be ineffective is recorded directly in the comprehensive income statement.

Initially, the Company formally documents the hedge relationship between the derivative and the hedged item, as well as the objectives and risk management strategies pursued in establishing the hedge. This documentation includes identifying the hedge instrument, hedged item or transaction as well as the nature of the hedged risk. It also specifies the method for assessing the degree of effectiveness when offsetting the exposure to changes in the hedged element, whether in its fair value or in the cash flows attributable to the hedged risk. The effectiveness assessment is performed prospectively and retroactively, both at inception of the hedge relationship and systematically throughout the period for which it were designated.

The fair value of the derivative portfolio reflects estimates based on calculations performed using observable market data, employing specific valuation and risk management tools widely used by diverse financial entities.

g) Inventory

Materials for consumption and replacement are valued at cost or net realization value, whichever is lower.

The net realizable value is the estimated sales value during the normal course of business, less costs related to the sale and costs related to finishing the product.

When cash flows related to inventory purchases are covered by an effective hedge, the corresponding gains and losses accumulated in equity become part of the cost of acquired inventory.

Obsolescence is determined on the basis of the commercial turnover of equipment and accessories. According to the Company's policies, marketable materials with a turnover in excess of 360 days have been defined as having slow turnover. Likewise, stored scrapped products or accessories are considered to be a total loss.

2. Significant accounting principles, continued

h) Impairment of non-current assets

At each year-end non-current assets are evaluated for possible indications of impairment. If such indications exist, the Company estimates the asset's recoverable amount, which is its value in use or its fair value, less cost to sell, whichever is greater. Value in use is determined by discounting estimated future cash flows. When an asset's recoverable amount is less than its net book value, impairment is recorded.

To calculate impairment, the Company estimates the return on assets assigned to the different cash generating units based on expected cash flows.

i) Leases

Leased assets for which the lessor retains a significant part of the risks and rewards of ownership are classified as operating leases. Payments made on this type of lease are charged to income on a straight-line basis over the term of the lease. Future obligations on these contracts are detailed in Note 25.

Leased assets for which the significant risks and rewards of ownership are transferred to the Company are considered finance leases. Initially, the asset and associated liability are recorded at the fair value of the leased asset or the present value of the minimum agreed-upon lease payments if lower. Interest expense is charged to income throughout the life of the lease. Depreciation of these assets is included in depreciation of Property, Plant and Equipment. The Company reviews all contracts to determine if they contain an embedded lease. At the end of the periods 2018 and 2017 were not identified leasing implicit.

j) Income taxes

The income tax expense for each year comprises current and deferred income taxes.

Tax assets and liabilities for the current and prior periods are measured at the amount the Company estimates it will recover or pay to tax authorities. Tax rates and government regulations used to calculate these amounts are those in force as of each exercise 27% and 25.5% and September 30, 2018 and 2017, respectively.

The deferred tax amount is obtained from analyzing temporary differences that arise due to differences between the tax and book values of assets and liabilities, mainly allowance for doubtful accounts, depreciation of Property, plant and equipment and staff severance indemnities.

Under Chilean tax regulations tax loss carry forwards can be realized as future tax benefits with no time restrictions.

Temporary differences generally become taxable or deductible when the related liability is settled or the related asset is recovered. A deferred tax liability or asset represents the amount of tax payable or refundable in future years under the currently enacted tax laws and rates as a result of temporary differences determined as of the date of issuance of the financial statements. Deferred tax assets and liabilities are not discounted at their current value and are classified as non-current.

2. Significant accounting principles, continued

k) Goodwill

Represent the difference between acquisition cost and fair value, of the assets acquired, liabilities assumed and identifiable contingent liabilities acquired from an associate. After initial recognition, goodwill is recorded at cost, less any accumulated impairment loss.

The Company tests goodwill impairment annually and when there are indicators that the net carrying amount might not be fully recoverable. The impairment test which is based on fair value is performed for each cash generating unit, for which the goodwill has been allocated. If that fair value is less than the carrying amount, an irreversible impairment loss is recognized in the income statement.

Deferred tax assets and liabilities are not discounted at their present value and are classified as non-current.

l) Intangibles

i) Concession licenses

Concession licenses correspond to the cost incurred to obtain mobile cellular telephone public services concessions. They are presented at their acquisition cost less accumulated amortization and less any impairment loss, should there be any. The Company amortizes these licenses over the concession period (30 years from the date of publication of the decree that accredits the respective license in the Official Gazette, which began in December 2003).

ii) Licenses and softwares

Intangibles includes software licenses and the right to use underwater cable, which are recorded at acquisition or production cost, less accumulated amortization and less any accumulated impairment loss. Also includes intangible assets being developed which correspond to commercial systems applications, mainly billing, collecting and collections, to be used by the Company in the normal course of its operations in relation to its customer. These intangible assets being developed are recorded at acquisition cost plus all costs associated to their implementation and are amortized over the period in which their use is expected to generate income.

Software licenses and rights to use underwater cable have finite useful lives and are amortized over their estimated useful lives. As of the close of each period date there is an analysis underway to determine whether there are events or changes that indicate that the net book value might not be recoverable, in which case impairment tests will be carried out.

The methods and periods of amortization applied are reviewed as of each year-end and if applicable, adjusted in a prospective manner.

The Company amortizes software licenses and the right to use underwater cable using the straight-line method over their estimated useful lives, which for software licenses is 3 years and for rights to use underwater cables, a maximum of 20 years.

2. **Significant accounting principles**, continued

m) Property, plant and equipment

Property, plant and equipment items are valued at acquisition cost, less accumulated depreciation and less applicable impairment losses. Land is not depreciated.

Acquisition cost includes external costs plus internal costs necessary to carry out the investment, comprised of direct costs, direct labor costs used in the installation and any other cost necessary to carry out the investment. In addition, the Company recognizes an obligation for assets that will be dismantled, corresponding to future disbursements that the company must make for removal of certain installations. These future disbursements are incorporated in the restated value of the asset, recognizing the corresponding dismantling provision.

Changes in the valuation of existing dismantling liabilities, derived from changes in the amount or temporary structure of outflow of resources that incorporate economic benefits required to settle the obligation, or a change in the discount rate, shall be added to or deducted from the cost of the corresponding asset in the current period. The amount deducted from the cost of the asset must not exceed its carrying amount. If the decrease in the liability should exceed the carrying amount of the asset, the excess is immediately recognized in income for period.

An asset's dismantling provisioned cost is recognized in the income statement through depreciation over its useful life, under depreciation and amortization expense. The provision discount process is recognized in income for the period as finance cost.

Interest and other financial expenses incurred and directly attributable to the acquisition or construction of qualifying assets, May be capitalized. Qualifying assets, under the criteria of the Telefónica Group, are assets that require at least 18 months of preparation for their use or sale. At the closure of periods of 2018 and 2017 there are no capitalized interests.

Costs for improvements that result in increased productivity, efficiency, or extension of the useful lives of assets, are capitalized as higher cost of such assets when they comply with the requirements to be recognized as an asset.

Repair and maintenance expenses are charged to the income statement account for the period, in which they are incurred.

n) Depreciation of property, plant and equipment

The Company depreciates Property, plant and equipment from the moment when the assets are in condition to be used, distributing the cost of the assets on a straight-line basis over the respective estimated useful life. Projects classified under building in progress, for which their estimated termination date as of each period closing has expired, but are in usable condition are also included.

The average annual financial depreciation rate of the Company is approximately 10.28% and 9.56% to September 30, 2018 and 2017, respectively.

2. Significant accounting principles, continued

n) Depreciation of property, plant and equipment, continued

Estimated useful lives are summarized in the following detail:

Assets	Useful lives in years	
	Minimum	Maximum
Buildings	5	40
Transportation equipment	7	10
Supplies and accessories	7	10
Office equipment	10	10
Information equipment	4	4
Network and communications equipment	5	20
Property, plant and equipment under financial leases	4	40
Other property, plant and equipment	2	7

Estimated residual values, amortization methods and exercise are reviewed as of each year-end and if appropriate, adjusted prospectively.

ñ) Provisions

i) Post-employment benefits

The Company is obligated to pay staff severance indemnities in respect of collective negotiation agreements. This obligation is provisioned using the actuarial value of the accrued benefit cost method, using an nominal annual discount rate of 5.02% y 4.89% at September 30, 2018 and 2017 respectively, considering estimations such as future permanence, employee mortality rate and future salary increases determined on the basis of actuarial calculations. Discount rates are determined by reference to market interest curves.

ii) Provision for dismantling expenses

Corresponds to the cost that will be incurred in the future for dismantling microwave antennas from the telecommunications infrastructure once the third-party site rental contract ends. This cost is calculated at current value and recorded as a property, plant and equipment item in assets and as a non-current accrual for future obligations. That property, plant and equipment item is amortized over the duration of the asset associated to that accrual.

iii) Other provisions

Provisions are recognized when the Company has a present legal or constructive obligation, as a result of a past event, whose settlement requires an outflow of resources that is considered likely and can be reliably estimated. This obligation can be legal or constructive, derived from among other factors, regulations, contracts, common practices or public commitments that create a valid third-party expectation that the Company will assume certain responsibilities.

2. Significant accounting principles, continued

o) Income and expenses

Income and expenses are recognized in the income statement based on the accrual criteria, i.e. when the real flow of goods and services that they represent is produced and can be reliably measured, regardless of the moment at which the cash flows or financing derived from it is produced.

The Company's income is produced mainly by providing the following:

i) Telecommunications

It is composed of traffic voice and broadband, international business (correspondents), multiservice network services and capacities, television, interconnection, network and equipment rental, sale of equipment and other services, such as value added services or maintenance. Products and services can be sold separately or jointly, in commercial packages.

In the case of commercial offers where the customer pays a flat rate, which can include minutes, broadband and pay TV plans, revenue is recognized in a straight-line over the period covered by the rate paid by the customer.

In the case of revenue generated only by traffic, it is recorded as it is consumed.

In equipment sales, revenue is recognized at the time of delivery of the equipment to the customer; in case of sales including installation, configuration, startup or other complementary activities, revenue is recognized upon satisfactory reception by the customer.

Revenue from capacity and multi-service networks, is accrued as the services are rendered.

Interconnection revenue derived from fixed-mobile and mobile-fixed calls, as well as from other services used by customers, is recognized in the period in which such calls are placed.

The Company has current agreements with foreign correspondents, with conditions which are established to regulate international traffic and their collection or payment is performed in accordance with net traffic exchange and the rates set in each agreement. Accounting for this exchange is on an accrual basis, recognizing the costs and income in the period in which they are produced, recording balances receivable or payable for each correspondent under "Trade and other accounts receivable" or "Trade and Other Payables", as applicable.

The amount corresponding to traffic that has been pre-paid and use is pending generates deferred income which is recorded in liabilities. Electronic top-ups usually have an expiry period of up to 90 days, and any unused prepaid traffic is recognized directly in income when traffic is consumed or when the top-up expires, since as of that moment the Company has no remaining obligations to provide the service.

Monthly fees are recognized as income using the straight-line method in the corresponding period. Rentals and other services are recognized as income as the service is provided.

2. Significant accounting principles, continued

o) Income and expenses, continued

i) Telecommunications, continued

In 2018 and in accordance with IFRS 15, income from commercial package offers that combine different goods and services for fixed telephone service, data, Internet and television, the Company determines whether it is necessary to separate the different elements identified, applying the appropriate revenue recognition criterion for each case. Total revenue for the package is allocated to its identified elements on the basis of their respective fair values (i.e. the fair value of each individual component, in relation to the total fair value of the package), unlike the criteria applied up to last year (in accordance with IAS 18) where no amounts contingent on delivery of the remaining elements to be provided to customers were allocated. To the extent that packages are commercialized with an equipment discount, the application of the new criteria will involve an increase in the recognition of income from sale of equipment, which will generally be recognized coinciding with the time of delivery to the customer, at the expense of periodic income from providing services in subsequent periods.

Likewise, IFRS 15 requires the recognition of an asset for any incremental costs which are expected to be recovered, incurred to obtain and comply with a contract, and their subsequent allocation to profit or loss in the same extent in which income related to that asset is allocated.

When comparing the new standard to the standard in force as of December 31, 2017, IFRS 15 establishes requirements that are much more detailed in respect to the accounting treatment of contract modifications. Thus, modifications determined have been recorded with a retroactive effect (as a continuation of the original contract) whereas others have been recognized prospectively as a separate contract, accounting for termination of the existing contract and the creation of a new one.

All costs directly associated to obtaining revenue are recognized in profit and loss to the extent that the revenue is generated. The rest of the expenses are recognized in profit and loss when they are accrued.

ii) Customer loyalty program:

Consists mainly in a program called “Club Movistar” which provides multiple benefits to customers which can be provided by third parties or by the Company. These benefits will be reflected as a discount in revenue from products exchanged for points. As of September 30, 2018, the valuation of this loyalty program is immaterial in relation to the contracts for which they have been generated.

2. Significant accounting principles, continued

o) Income and expenses, continued

iii) Government subidies:

Operating subsidiaries Telefónica Chile S.A. and Telefónica Móviles Chile S.A. participate in tenders for State projects associated to the Telecommunications Development Fund, for the purpose of receiving resources to install operating assets for the operation and exploitation of public services. These resources, called government subsidies, are initially recorded as deferred income, under other non-financial liabilities, and charged against income over the useful lives of the assets associated to those subsidies (Note 21).

Subsidiary Telefónica Investigación y Desarrollo Chile SpA participates in tenders for State projects associated to the Innova Chile Committee, in order to carry out research and development, technology transfer and marketing activities, in the area of information and communication technologies. These government subsidies are initially recorded as deferred revenue under "other non-financial liabilities", and are recoded in income as the projects progress in their development (Note 21).

p) Use estimates

The following section shows the main future hypotheses assumed and other relevant sources of uncertainty in estimates as of the reported periods that could have a significant effect on the financial statements in the future.

i) Property, plant and equipment and intangibles

The accounting treatment for Property, plant and equipment and intangible assets uses estimates to determine useful life for the purpose of calculating depreciation and amortization.

Determination of useful lives requires estimates regarding expected technological progress and alternative use of assets. Hypotheses regarding technological framework and its future development imply a significant degree of judgment, as the timing and nature of future technological change is difficult to predict.

ii) Deferred taxes

The Company evaluates probability of recovery of deferred tax assets based on estimates of future earnings. This probability of recovery ultimately depends on the Company's capacity to generate taxable income throughout the period in which the deferred tax assets are deductible.

This analysis takes into consideration the forecasted reversal calendar for deferred tax liabilities as well as estimates of taxable income, based on internal projections that are updated to reflect recent trends.

2. Significant accounting principles, continued

p) Use estimates, continued

ii) Deferred taxes, continued

Determining the proper classification of tax items depends on various factors, including timing estimates, realization of deferred tax assets and the expected timing of tax payments. The real flows of income tax payments and recoveries May differ from estimates made by the Company as a consequence of changes in tax legislation or of unforeseen future transactions that May affect tax balances.

As described in Note 1 and Note 11 d), during 2017 the Company merged by absorption with its subsidiary Telefónica Móviles Chile S.A., generating an impact on income in the amount of ThCh$140,423,552. That amount arises from the allocation of tax goodwill generated in the merger, to the non-monetary assets of the absorbed entity, which is ultimately reflected in the recording of a deferred tax asset under IFRS. This allocation requires that management determine the fair value of those assets using their best estimate. As of March 31, the Company has concluded the process of estimating the fair value of non-monetary assets involved in the merger and has determined deferred taxes in the amount of ThCh$ 148,606,473, which will be amortized over the useful lives of the corresponding assets.

iii) Provisions

Given the uncertainty inherent to estimates used to determine provisions, real disbursements May differ from the amounts originally recognized using these estimates.

Determination of the amounts of provisions is based on the best estimate of the disbursements that must be made for the corresponding obligations, taking into consideration all information available as of period-end, including the opinion of independent experts, such as legal advisors and consultants.

iv) Post-employment benefits

The cost of defined benefit post retirement plans as well as the present value of the obligation is determined using actuarial valuations. The actuarial valuation involves making assumptions about discount rates, future salary increases, mortality rates and future pension increases. All assumptions are reviewed once a year. In determining the appropriate discount rate management considers the interest rates of instruments issued by the Central Bank of Chile. The mortality rate is based on publicly available mortality tables for the specific country.

Future salary increases and pension increases are based on expected future inflation rates for the specific country. View details of the actuarial hypotheses used in Note 20a).

2. Significant accounting principles, continued

p) Use estimates, continued

v) Financial assets and liabilities

Where the fair value of financial assets and financial liabilities recorded in the balance sheet and disclosed in the notes cannot be derived from active markets, they are determined using valuation techniques including the discounted cash flows model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgment is required in establishing fair values. The judgments include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instrument.

q) Methods of consolidation

Consolidation has been carried out using the global integration method for companies where there is control, whether through effective control or the existence of agreements with the rest of the shareholders.

All balances and transactions between consolidated companies have been eliminated in the consolidation process. Likewise, the margins included in these operations performed by companies dependent on other companies of the Company for capitalized goods or services have been eliminated in the consolidation process.

The accounts in the statement of comprehensive income and consolidated cash flows gather, respectively, the income, expenses and cash flows of companies that stop being a part of the Company up to the date on which the participation has been sold or the company has been liquidated. Likewise, in the case of new acquisitions, income and expenses and cash flows of the new companies are gathered from the date of purchase of those companies.

The value of the participation of non-controlling shareholders in the equity and income of dependent companies consolidated using the global integration method is presented in “non-controlling interests” and “income attributable to non-controlling interests”, respectively.

r) New IFRS and Interpretations of the IFRS Interpretations Committee

i. Publication of new standards

IFRS improvements and amendments, as well as interpretations that have been published during the exercise are detailed below. As of the closing date, these standards are still not in forced and the Company has not opted for early application of any of them:

	New Standard	Mandatory application date
IFRS 16	Leases	January 1, 2019
IFRS 17	Insurance Contracts	January 1, 2021
IFRICC 23	Uncertainty Over Income Tax Treatment	January 1, 2019

2. Significant accounting principles, continued

r) New IFRS and Interpretations of the IFRS Interpretations Committee, continued

i. Publication of new standards, continued

IFRS 16 "Lease"

Published in January 2016 it establishes the principle for recognition, measurement, presentation and disclosure of leases. IFRS 16 substitutes current IAS 17 and introduces a single model for lessee accounting and requires that a lessee recognize the assets and liabilities of all lease agreements with a term of more than 12 months, unless the underlying asset is of low value. IFRS 16 is effective for annual exercises beginning on or after January 1, 2019 and early application is allowed for entities that apply IFRS 15 before the date of the initial application of IFRS 16.

IFRS 17 "Insurance Contracts"

Published in May 2017, it replaces current IFRS 4. IFRS 17 will mainly change accounting for all entities that issue insurance contracts and investment contracts with discretional participation characteristics. The standard is applicable to annual exercises commencing as of January 1, 2021. Early application is allowed only when IFRS 15, "Revenue from Contracts with Customers" and IFRS 9 "Financial Instruments" are applied.

IFRIC 23 "Uncertainty over Income Tax Treatment"

Published in June 2016. This interpretation clarifies how the recognition and measurement requirements of IAS 12 are applied when there is uncertainty about tax treatment.

ii. Publication of standards modifications

	Improvements and amendments	Mandatory application date
IFRS 9	Financial Instruments	January 1, 2019
IAS 28	Investments in Associates and Joint Ventures	January 1, 2019
IFRS 3	Business Combinations	January 1, 2019
IFRS 11	Joint Arrangements	January 1, 2019
IAS 12	Income Taxes	January 1, 2019
IAS 23	Borrowing Costs	January 1, 2019
IAS 19	Employee Benefits	January 1, 2019
IFRS 10	Consolidated Financial Statements	Determined
IAS 28	Investments in Associates and Joint Ventures	Determined

IFRS 9 "Financial Instruments"

Published in October 2017. The amendment allows more assets to be measured at amortized cost than in the previous version of IFRS 9, particularly certain prepaid financial assets with negative compensation. The qualifying assets, which include certain loans and debt instruments, would have otherwise been measured at fair value through profit or loss (FVTPL). In order to qualify for amortized cost, the negative compensation must be "reasonable compensation for early termination of the contract ".

2. Significant accounting principles, continued

r) New IFRS and Interpretations of the IFRS Interpretations Committee, continued

ii. Publication of standards modifications, continued

IAS 28 "Investments in Associates and Joint Ventures"

Published in October 2017. This amendment clarifies that companies that account for long-term interests in an associate or joint venture – in which the equity method is not applicable – must be accounted for use IFRS 9. The Board has published an example that illustrates how companies apply the requirements of IFRS 9 and IAS 28 to long-term interests in an associate or a joint venture.

IFRS 3 "Business Combinations"

Published in December 2017. The amendment clarified that obtaining control of a company that is a joint operation, is a business combination that is achieved in stages. The acquirer must remeasure its previous participation in the joint operation at fair value on the date of acquisition.

IFRS 11 "Joint Arrangements"

Published in December 2017. The amendment clarifies, that the party that obtains joint control of a company that is a joint operation, cannot remeasure its previously held participation in the joint operation.

IAS 12 "Income Taxes"

Published in December 2017. The amendment clarified that the consequences of income tax on dividends from financial instruments classified as equity, must be recognized on the basis of where the past transactions or events that generated the distributable benefits were recognized.

IAS 23 "Borrowing Costs"

Published in December 2017. The amendment clarified that, if a specific loan is still outstanding after the qualified asset is ready for its foreseen use or sale, it becomes part of general borrowings.

IAS 19 "Employee Benefits"

Published in February 2018. The amendment requires that entities use updated assumptions to determine the cost of current service and net interest for the rest of the period after a modification, reduction or liquidation of the plan; and recognize any reduction in a surplus of profits or losses as part of the past cost of service, or a profit or loss in the settlement, even if this surplus was not previously recognized because it did not exceed the upper limit of the asset.

2. Significant accounting principles, continued

r) New IFRS and Interpretations of the IFRS Interpretations Committee, continued

ii. Publication of standards modifications, continued

IFRS 10 "Consolidated Financial Statements" and IAS 28 "Investments in Associates and Joint Ventures"

Published in September 2014. This amendment addresses an inconsistency in the requirements of IFRS 10 and IAS 28 related to the treatment of the sale or contributions of assets between an investor and its associate or joint venture. The main consequence of the amendment is that a full gain or loss is recognized when the transaction involves a business (whether it is in a subsidiary or not) and a partial gain or loss when the transaction involves assets that do not constitute a business, even if these are in a subsidiary.

iii. Application of new standards

Based on the analysis performed to date, the Company believes that the application of many of these standards, improvements, amendments and interpretations will not have a significant impact on the financial statements in the exercise of initial application. However, the following standards that have been published, but are not yet in effect will have a significant impact on the Company's consolidated financial statements at the time of their adoption and prospectively:

- **IFRS 16 Leases**

IFRS 16 establishes that companies that act as lessees must recognize the assets and liabilities derived from all lease contracts (except for short-term lease agreements and those involving assets with low value) in the statement of financial position.

The Company has a very large number of lease agreements where it acts as lessee for various assets, mainly: towers, circuits, real estate for offices and stores and land where its own towers are located. Under current regulations, a significant part of these contracts are classified as operating leases, recording the corresponding payments using the straight-line method throughout the term of the contract, generally. The Company is currently in the process of estimating the impact that this new standard will have on those contracts.

Due to the different alternatives available, as well as the complexity of the estimates and the large number of contracts, the Company has still not completed the implementation process, therefore to date it is not possible to make a reasonable estimate of the impact that the application of this standard will have.

Notwithstanding, considering the volume of affected contracts, and the magnitude of the committed lease payments that are reflected in the annual financial statements, the Company believes that the amendments introduced by IFRS 16 will have a significant impact.

2. Significant accounting principles, continued

s) Statement of cash flows

The statement of cash flows includes movements of cash performed during the period, determined using the direct method. Cash flows are understood to be cash inflows and outflows or inflows and outflows of other equivalent means, such as highly liquid time deposits maturing in less than three months with low risk of change in value. The following expressions are used in the following sense:

i. Operating activities: are activities that constitute the main source of the Company's ordinary income, as well as other activities that cannot be qualified as from investing or financing activities.

ii. Investing activities: are activities such as acquisition, alienation or disposal of non-current assets by other means and other investments not included in cash and cash equivalents.

iii. Financing activities: are activities that produce changes in the size and composition of total shareholders' equity and in liabilities of a financial nature.

3. Changes in Accounting Policy and Disclosures

IFRS have been consistently applied during the exercise covered by these financial statements, except for the application of IFRS 9 and IFRS 15, current since January 1, 2018.

The effect of these changes is as follows:

a) **IFRS 9 Financial Instruments**

IFRS 9 establishes the criteria for recording and valuating financial instruments. After analyzing the effects of the new criteria introduced by this standard, the most significant aspects identified by the Company are, among others, that:

- It simplifies the current financial asset valuation model and establishes three main categories: amortized cost, at fair value through profit or loss and at fair value through other comprehensive income, based on the business model and characteristics of the contractual cash flows. There are no significant changes in comparison to the criteria used as of December 31, 2017, in respect to recording and valuation of financial liabilities.

- It introduces a new model for financial asset impairment, the expected loan losses model, that substitutes the incurred loss model under IAS 39. Consequently, the application of the new requirements has led to an acceleration in the recognition of financial asset impairment losses.

- It introduces a new model for accounting for hedges, that is less restrictive, requiring an economic relationship between the hedged item and the hedging instrument and that the hedging relationship ratio be the same that is applied by the entity for its risk management. Likewise, the new standard modifies the hedging relationship documentation criteria.

3. Changes in Accounting Policy and Disclosures, continued

a) IFRS 9 Financial Intruments, continued

The main change focuses on documentation of the hedging policies and strategies, as well as on the process for expected financial asset impairment loss estimate and the time of its recognition. The Company has decided to adhere to the option that allows it to re-express the figures for comparative periods presented in the year of first application of the new criteria.

As of January 1, 2018, the date of initial application of IFRS 9, the Company has recorded a net effect of ThCh$ 20,312,088, as a decrease in retained earnings, under equity, composed by ThCh$ 27,824,778 of effect of first-time application of IFRS 9 and ThCh$ 7,512,690 of deferred taxes.

b) **IFRS 15 Revenue from Contracts with Customers**

IFRS 15 allows two alternative transition methods: retroactive for each period presented, or retroactive with the cumulative effect of initial application recognized on the date of first application. The Company has adopted this second method of transition. The main practical solutions that the Company has applied are:

- The standard has not been applied retrospectively to contracts that were completed on a date prior to January 1, 2018.

- The requirements of the standard have been applied to groups of contracts with similar characteristics, since for this collective, the effects do not differ significantly in comparison to an individualized application per contract.

- The financial component is not considered significant when the period between the moment in which the goods or services committed to with the customer are transferred, and the moment at which the customer pays for these goods or services is one year or less, or when it does not exceed 7% of the total amount of the contract.

- The costs incurred for obtaining contracts have been recognized as expenses as they are incurred when their foreseen amortization period is one year or less.

The most relevant impact due to the amendments introduced by IFRS 15 refer to the increase in revenue recognized on sale of equipment, which is recognized at the time of delivery to the customer, at the expense of periodic revenue from providing services in subsequent periods, capitalizing and deferring incremental costs, related to obtaining and complying with contracts, and the criteria for identification of elements in contracts with customers.

As of January 1, 2018, date of initial application of IFRS 15, the Company has recorded a net effect of ThCh$ 110,658, as an increase in retained earnings, under equity, composed of ThCh$ 2,705,197 of effect of first-time application of IFRS 15 and ThCh$ 2,594,539 of deferred taxes.

4. Financial information by segment

Telefónica Móviles Chile S.A. discloses segment information in accordance with IFRS 8, "Operating Segments" which establishes the standards for reporting operating segments and related disclosures for products and services and geographical areas. Operating segments are defined as components of an entity for which there is separate financial information that is regularly used by the main decision maker to decide how to assign resources and to evaluate performance. The Company presents segment information that is used by management for internal decision making purposes.

The Company manages and measures the performance of its operations by business segment. Since the Company's corporate organization coincides basically with that of the businesses, and therefore the segments, distribution established in the information presented below, is based on the financial information of the companies. These are integrated in each segment. Assets and liabilities correspond to those directly attributable to the segment.

The operating segments reported internally are as follows:

a) Mobile Telecommunications

Mobile Telecommunications services mainly include revenue from the providing of mobile telecommunications services, sale of electronic prepaid top-up and the sale of handheld equipment. Revenue is recognized as the services are provided.

b) Fixed Telecommunications

Landline telephone services include basic telephone services, connections and line installations, value added services, broadband, dedicated lines, international long-distance services ,marketing of handsets, and circuit media rental and others. According to the financial statements, the income is recognized as the services are provided or the equipment is sold.

c) Television Services

Multimedia services include direct and indirect development, installation, maintenance, marketing and operations of television services via cable, satellite, broadband or any other physical means using any physical or technical means, including individual paid services or multiple basic channels, special or paid, videos on demand and interactive or multimedia television services. Corresponding with the financial statements, income is recognized as the services are delivered.

d) Corporate Communications and Data

Corporate communications services include revenue from the sale and rental of telecommunications equipment and the sale of networks to corporate customers, rental of networks associated to public or private projects and data transmission services. Revenue is recognized as the services are provided.

e) Others

"Other" includes logistics, personnel and management services.

4. **Financial information by segment,** continued

Relevant information regarding Telefónica Móviles Chile S.A. and his subsidiaries, which represent different segments, together with information regarding other subsidiaries, corresponding to September 30, 2018, December 31, 2017 and September 30, 2018 is detailed as follows:

For the exercise ended as of September 30, 2018	Mobile Telecommunications	Fixed Telecommunications	Corporate Communication and Data	Television Services	Other	Eliminations	Total

There are no differences in the criteria used, in respect to the previous period, in relation to measurement and valuation of segment income and valuation of their assets and liabilities, as well as transactions between segments.

Accounting criteria regarding transactions between subsidiaries of Telefónica Móviles Chile S.A. which are performed at market prices, independently and in a manner similar to transactions with third parties, consider that balances, transactions and profits or losses remain in the segment of origin and are only eliminated in the consolidated financial statements of the entity.

5. Cash and cash equivalents

Cash and cash equivalents are detailed as follows:

Concepts	Currency	09.30.2018 ThCh$	12.31.2017 ThCh$
Cash (a)		**646,152**	**681,583**
	CLP	646,152	640,992

	EUR	**392,000**	**70,335**
	Others currencies	**201,445**	**-**

Each item within cash and cash equivalents is detailed as follows:

a) Cash

The cash balance is composed of funds to be rendered destined to minor expenses and the book value is the same as the fair value.

b) Banks

The balance in banks is composed of money held in checking accounts and the book value is the same as the fair value.

5. Cash and cash equivalents, continued

c) Time deposits

Time deposits maturing in less than 90 days are recorded at fair value and as of September 30, 2018 and December 31, 2017 are detailed as follows:

Type of investment	Currency	Principal in original currency (thousands)	Average annual rate	Average days to maturity	Principal in local currency ThCh	Accrued interest in local currency ThCh$	Foreign currency translation local currency ThCh$	09.30.2018 ThCh$
Time deposits	CLP	140,805,000	2.40%	11	140,805,000	68,734	-	140,873,734
Time deposits	USD	179	2.85%	12	119,111	47	(1,205)	117,953
Total					**140,924,111**	**68,781**	**(1,205)**	**140,991,687**

Type of investment	Currency	Principal in original currency (thousands)	Average annual rate	Average days to maturity	Principal in local currency ThCh$	Accrued interest in local currency ThCh$	Foreign currency translation local currency ThCh$	12.31.2017 ThCh$
Time deposits	CLP	170,570,000	2.91%	10	170,570,000	44,407	-	170,614,407
Total					**170,570,000**	**44,407**	-	**170,614,407**

d) Repurchase agreement

As of September 30, 2018, the Company did not have Repurchase agreement. At December 31, 2017 are as follows:

Code	Date		counterparty	Currency Origin	Subscription value of currency origin (ThCh$)	Annual rate	Total Value ThCh$	accounting value ThCh$
	Start	Term				%		12.31.2017
CRV	Dec-28-17	Jan-02-18	BBVA	CLP	12,000,000	1.80%	12,003,000	12,001,800
CRV	Dec-29-17	Jan-01-18	BCI	CLP	1,030,000	1.80%	1,030,206	1,030,104
CRV	Dec-29-17	Jan-02-18	BBVA	CLP	2,000,000	1.80%	2,000,400	2,000,200
	Total				**15,030,000**		**15,033,606**	**15,032,104**

6. Other current and non-current financial assets

Other current and non-current financial assets are detailed as follows:

Concepts		09.30.2018		12.31.2017	
		Current ThCh$	Non-Current ThCh$	Current ThCh$	Non-Current ThCh$
Guarantees established	(a)	137,124	50,468	86,315	50,468
Other investments	(b)	-	5,600,505	-	7,188,206
Financial instruments	(c)	30,009,200	-	-	-
Exchange rate hedge	(See Note 18.2)	7,868,417	123,986,257	690,553	103,224,236
Total		**38,014,741**	**129,637,230**	**776,868**	**110,462,910**

a) Guarantees are those established for clients, official organizations and other institutions.

b) Non-current investments are detailed as follows:

Participation	Country	Investment currency	09.30.2018 ThCh$	12.31.2017 ThCh$
Telefónica Brasil (1) (2)	Brazil	REAL	5,596,648	7,184,349
Other participation	Chile	CLP	3,857	3,857
Total			**5,600,505**	**7,188,206**

(1) This investment is valued at market value through the trading of its shares, information obtained in the Sao Paulo Stock Exchange (Bovespa), and variations in their value are recorded when they occur, directly in equity under other reserves.

(2) As of September 30, 2018, dividends in the amount of ThCh$ 191,996, were accrued on the 0.06% share in the equity of Telefónica Brasil. As of September 30, 2018 and December 31, 2017, dividends in the amount of ThCh$ 177,209 and ThCh$ 386,594, respectively, were received, which are recorded in finance income in the income statement.

c) Financial Instruments are detailed as follows:

Type of investment	Currency	Capital in original currency (thousands)	Effective rate	Average days to maturity	Capital in local currency ThCh$	Accrued interest ThCh$	09.30.2018 ThCh$
Financial instruments	CLP	30,000,000	2.76%	45	30,000,000	9.200	30,009,200
Total		**30,000,000**			**30,000,000**	**9.200**	**30,009,200**

As of December 31, 2017, the Company did not have financial investments.

7. Other current and non-current non-financial assets

Other non-financial assets correspond to prepayments are detailed as follows:

Concepts	09.30.2018 Current ThCh$	09.30.2018 Non-current ThCh$	12.31.2017 Current ThCh$	12.31.2017 Non-current ThCh$
Deferred cost of handsets (1)	4,716,283	-	15,770,669	-
Unearned leasing	14,626,809	871,632	14,434,194	980,618
Franchisee commissions (2)	1,210,352	-	18,495,019	-
Other prepaid expenses (3)	17,616,219	1,608,355	14,139,527	6,353,869
Other (4)	4,195,216	-	3,041,077	-
Total	**42,364,879**	**2,479,987**	**65,880,486**	**7,334,487**

(1) Corresponds to the cost of dispatched prepaid units, that have not been activated by the end customers. As of September 30, 2018, and December 31, 2017, the number of handsets pending activation is ThCh$ 63,351 and ThCh$ 229,759, respectively.

(2) Up until December 31, 2017, this item was used to capitalize all commissions on capturing derecognized customers, which were deferred over 6 months; with the coming into effect of IFRS 15, as of January 1, 2018 only variable customer capture commissions are capitalized and amortized over a period of 18 months.

(3) This item includes ThCh$ 13,226,344 and ThCh$ 12,418,654 in current and ThCh$ 1,597,985 and ThCh$ 6,299,533 in non-current, as of sepptember 30, 2018 and December 31, 2017, respectively, for the capitalization of compliance costs associated to television equipment; Under IFRS 15 the amortization period was reduced in comparison to the period in which the previous standard was applied. In addition, it includes ThCh$ 4,349,875 in current, for Radioelectric spectrum ThCh$ 550,046, for ELA license maintenance and support in the amount of ThCh$ 260,052 for Software Base Program Believe (PET-PROD-TTD), AMDOCS ThCh$ 257,495, for RedHat licensing in the amount of ThCh$ 181,160 for FO La Serena, Valdivia maintenance ThCh$ 132,644, and other licenses and prepaid expanses in the amount ThCh$ 2,968,474.

(4) This item mainly includes remaining VAT and recoverable taxes in the amount of ThCh$ 2,087,539 and ThCh$ 1,901,685, and advance insurance in the amount of ThCh$ 2,107,677 and ThCh$ 1,139,392, as of September 30, 2018 and December 31, 2017, respectively.

8. Current trade and other accounts receivable

a) The composition of current trade and other accounts receivables as follows:

Concepts	09.30.2018 Gross value ThCh$	09.30.2018 Allowance for doubtful accounts ThCh$	09.30.2018 Net value ThCh$	12.31.2017 Gross value ThCh$	12.31.2017 Allowance for doubtful accounts ThCh$	12.31.2017 Net value ThCh$
Receivables on current loan transactions	**508,903,159**	**(224,683,118)**	**284,220,041**	**416,595,242**	**(173,091,668)**	**243,503,574**
Invoiced services	366,441,827	(220,887,339)	145,554,488	305,264,245	(173,091,668)	132,172,577
Services provided and not invoiced (1)	118,091,264	(2,845,253)	115,246,011	111,330,997	-	111,330,997
Contractual asset (2)	24,370,068	(950,526)	23,419,542	-	-	-
Miscellaneous receivables	**16,152,581**	**-**	**16,152,581**	**15,436,566**	**-**	**15,436,566**
Total	**525,055,740**	**(224,683,118)**	**300,372,622**	**432,031,808**	**(173,091,668)**	**258,940,140**

(1) From January 1, 2018, with the coming into effect of IFRS 9, revenue allowances are included in the calculation of allowance for doubtful accounts.

(2) Under IFRS 15, the contractual asset corresponds to the difference between income from sale of handsets and the amount received from the customer at the beginning of the contract.

b) The composition of current trade and other accounts receivable with overdue net balances that have not been collected and have not been provisioned as a whole is detailed as follows:

Concepts	09.30.2018 Less than 3 months	09.30.2018 3 to 6 months	09.30.2018 6 to 12 months	09.30.2018 Greater than 12 months	09.30.2018 Total	12.31.2017 Less than 3 months	12.31.2017 3 to 6 months	12.31.2017 6 to 12 months	12.31.2017 Greater than 12 months	12.31.2017 Total
Miscellaneous receivables	37,785,304	10,155,233	-	-	47,940,537	30,875,776	5,735,933	-	-	36,611,709
Total	**37,785,304**	**10,155,233**	**-**	**-**	**47,940,537**	**30,875,776**	**5,735,933**	**-**	**-**	**36,611,709**

8. Current trade and other accounts receivable, continued

c) The movement of allowance for doubtful accounts, which includes "Current trade and other accounts receivable" and "Non-current trade and other accounts receivable" found in Note 12, is detailed as follows:

Movements	09.30.2018 ThCh$	12.31.2017 ThCh$
Beginning balance	**174,489,215**	**169,687,736**
Increases	36,160,868	46,229,952
Eliminations/ Additions	(10,896,626)	(41,428,473)
Adjustment on first-time application of IFRS 9 (see note 3)	27,824,778	-
Movements, subtotal	**53,089,020**	**4,801,479**
Ending balance	**227,578,235**	**174,489,215**

d) Allowance for doubtful account movements according to the composition of the portfolio as of September 30, 2018 and December 31, 2017 are detailed as follows:

Provisions and write-offs	09.30.2018 ThCh$	12.31.2017 ThCh$
Accrual for portfolio that has not been renegotiated	34,179,889	46,757,086
Accrual for renegotiated portfolio	1,980,979	(527,134)
Adjustment on first-time application of IFRS 9 (see note 3)	27,824,778	-
Write-offs for the exercise	(10,896,626)	(41,428,473)
Total	**53,089,020**	**4,801,479**

e) As of September 30, 2018 and December 31, 2017 the portfolio of returned documents and those in judicial collection is detailed as follows:

Portfolio of returned documents and judicial collection as of 09.30.2018	Returned notes receivable portfolio w/o guarantee	Returned notes receivable, portfolio w/guarantee	Notes receivable in judicial collection, portfolio w/o guarantee	Notes receivable in judicial collection, portfolio w/guarantee
Number of customers in portfolio of returned documents or those in judicial collection	6,534	-	-	-

9. Receivables from and payable to related companies, continued

c) Transaction, continued

For amounts greater than 10% of their total heading the origin of the specified transaction is reported.

Title XVI of the Company's Law, and other relevant standards, requires that a publicly traded corporation's transactions with related companies are carried out under terms similar to those commonly prevailing in the market.

There have been charges and credits to current accounts in the receivables of companies due to billing for sale of materials, equipment and services, The conditions of the Mercantile Current Account and Mandate are currents, accruing interest at a variable interest rate that adjusts to market conditions.

Sales and service rendering expire in the short-term (less than one year) and the expiry conditions for each case vary by virtue of the transaction that generates them.

d) Remuneration and benefits received by the Company's key employees:

The Company is managed by a Board of Directors composed of 14 members and its key employees are 64 and 67 executives for September 30, 2018 and 2017, respectively.

Concepts	07.01.18 to 09.30.18	09.30.2018	07.01.17 to 09.30.17	09.30.2017

11. Income Taxes, continued

c) Deferred tax assets and liabilities, continued

ii) Effect of tax goodwill due to merger

As indicated in Note 1, on May 2, 2017 the Company merged its subsidiary Telefónica Móviles Chile S,A, by absorption, thus generating recognition of deferred taxes during 2017 in the amount of ThCh$ 140,423,552, adjusting this estimate as of March 31, 2018 to ThCh$ 148,606,473, In both cases the adjustment was made with a credit to income under income tax, resulting from the difference between the tax value of the investment and taxable capital, value that was allocated to non-monetary assets arising from the merger.

As of September 30, 2018 and December 31, 2017, the balance of this deferred tax asset, amounts to ThCh$ 110,635,967 and ThCh$ 127,482,640, respectively.

d) Taxable Income

As of September 30, 2018 and 2017 a first category income tax provision has been established, therefore a taxable positive base was determined in the amount of ThCh$ 32,863,747 and ThCh$ 12,805,702 respectively for period, detailed as follows:

Concepts	Taxable Net Income			
	07.01.18 to 09.30.18	09.30.2018	07.01.17 to 09.30.17	09.30.2017

Deficit/exceso period anterior	-	2,444,165	(627,651)	(2,820,537)
Provision for wind up tax of subsidiary	-	-	-	14,964,597
Total first category taxes (3)	**7,594,408**	**16,346,452**	**2,933,353**	**16,047,483**

(1) Corresponds to contingencies of the parent company and subsidiary Telefónica Móviles Soluciones y Aplicaciones S,A, (see Note 27 b)),

(2) Corresponds to the deficit (surplus) in the tax provision calculated on 2016 and 2017 hedging instruments (liquidated), This tax provision deficit (surplus) is presented as higher o menor expense for the period,

(3) First category tax has been accounted for considering the increase in the rate from 25,5% to 27%, due to the tax reform of Law 20.780.

11. Income Taxes, continued

e) Income tax reconciliation

The income tax expense reconciliation for September 30, 2018 and 2017 are detailed as follows:

Conceptos	07.01.18 to 09.30.18		09.30.2018		07.01.17 to 09.30.17		09.30.2017

11. Income Taxes, continued

f) Current income tax liabilities

As of September 30, 2018 and December 31, 2017, current income tax liabilities are detailed as follows:

Concepts	09.30.2018 ThCh$	03.31.2017 ThCh$
Contingency provision (note 27 a)	22,101,895	18,424,224
Income tax accrual	3,384,106	2,362,100
Unic income tax	1,629,985	845,186
Others	231,693	231,692
Total	**27,347,679**	**21,863,202**

g) Tax reform

Law No, 20,780 which contains the Tax Reform which introduces amendments to the tax system of companies that pay first category tax, among other things, was published on September 29, 2014, In this context the income tax rate increases gradually, in this year to 25,5%, reaching a rate of 27% in 2018, in the partially integrated tax system, In the attributed income system incorporated with this same legal amendment, the maximum rate will be 25%.

For the purpose of preparing these financial statements, the Company has incorporated the maximum rate of 27% in the determination of deferred taxes, due to the incorporation of the Company in the partially integrated tax system established in article 14, letter B of the Income Tax Law.

Tax rates are detailed as follows:

Commercial year	Rate%
2015	22,5
2016	24,0
2017	25,5
2018	27,0

12. Non-current trade and other accounts receivable

a) Non-current trade and other accounts receivable are detailed as follows:

Concepts	09.30.2018 Gross value	09.30.2018 Allowance for doubtful accounts	09.30.2018 Net value	12.31.2017 Gross value	12.31.2017 Allowance for doubtful accounts	12.31.2017 Net value
	ThCh$	ThCh$	ThCh$	ThCh$	ThCh$	ThCh$
Receivables on non-current loan transactions	**22,041,689**	**(2,895,117)**	**19,146,572**	**9,302,468**	**(1,397,547)**	**7,904,921**

Ending balance as of 12,31,2017	**3,872,270**	**159,552,527**	**29,404,469**	**1,884,654**	**194,713,920**
Remaining average useful life	**-**	**2,8 years**	**15,2 years**	**4 years**	**-**

Licenses correspond to software licenses, which are obtained through non-renewable contracts therefore the Company has defined that they have definite useful lives of 3 years.

13. Intangible Assets other than goodwill, continued

Intangible assets with defined useful lives are amortized on a straight-line basis over their estimated useful lives, Amortization for each year is recognized in the statement of comprehensive income within "Depreciation and Amortization".

Intangible assets are tested for impairment whenever there is an indication of a potential loss in value, and in any case at each year-end.

As of December 31, 2017 there were no indications of loss of value of assets, therefore no impairment testing was carried out.

The main additions to intangible assets other than goodwill as of September 30, 2018 and December 31, 2017 are investments in information application and licenses.

Items in the intangibles heading that are fully depreciated and in use are licenses and franchises and amount to ThCh$ 511,124,451 and ThCh$ 445,050,849, as of September 30, 2018 and December 31, 2017, respectively.

14. Goodwill

Current goodwill as of this period was generated before the date of transition to and adoption of International Financial Reporting Standards, and as of September 30, 2018 the value recorded as of that date remains the same,

Goodwill movement as of September 30, 2018 and December 31, 2017 is as follows:

Taxpayer No,	Company	01.01.2018 ThCh$	Additions ThCh$	Eliminations ThCh$	09.30.2018 ThCh$
87,845,500-2	Telefónica Móviles Chile S,A, (1)	483,179,725	-	-	483,179,725

	Total	**504,839,853**	**-**	**-**	**504,839,853**

(1) On May 2, 2017, subsidiary Telefónica Móviles Chile S,A, was merged by absorption and the Company's name was changed,

(2) On April 30, 2016, the merger by incorporation of subsidiary Telefónica Larga Distancia S,A, in Telefónica Chile S,A, took place, with the latter absorbing the former, acquiring all its assets and liabilities and succeeding it in all it rights and obligations

14. Goodwill, continued

Assets indicated in goodwill are tested for impairment once a year, at each year-end, As of December 31, 2017 impairment testing was determined taking into consideration the following estimated variables:

i) Projected operating income and costs are based on the 2017 budget and on the Strategic Plan for 2018 and 2019, projecting a fourth and fifth year as a terminal value, These projections have been made taking into consideration the Company's best estimate, using sector projections, historical behavior of the business and future expectations.

ii) Cash flow projections are calculated at terminal value, covering a 5-year period, with the last period being the terminal value.

iii) Discount: The rate used to discount future cash flows is 8,19% (WACC), that represents the market value of the specific business and industry risk, taking into consideration the time value of money and individual risks of the assets being analyzed.

The growth rate for perpetual future cash flows is a conservative rate of 3%

iv) The valuation is determined using the Value in Use (VU) mechanism, that requires that the VU be determined through the net present value of the cash flows that the Company expects to receive from the use of the asset or Cash Generating Unit (CGUs).

According to the impairment calculations performed by management, as of 2017 year-end there has been no need detected to make significant adjustments since the recoverable value is greater than the book value in all cases.

There has been no impairment testing as of September 30, 2018.

15. Property, plant and equipment

a) The detail of Property, plant and equipment items for the periods September 30, 2018 and December 31, 2017, and their corresponding accumulated depreciation is as follows:

15. Property, plant and equipment, continued

Additions for the period 2018 fundamentally show the effect of incorporation of customer residential equipment (fixed telephone and broadband), voice and data equipment, E- Solutions; antennas and transmission equipment (infrastructure), nodes, energy systems and systems and developments.

As of September 30, 2018 Property, plant and equipment items originating from net financial lease operations amount to ThCh$ 313,216 in the categories of buildings and the other property, plant and equipment, As of December 31, 2017, the amount for this concept was ThCh$ 319,028.

In the normal course of business, the Company monitors both new and existing assets and their depreciation rates, adjusting for technological evolution and development of markets in which we compete.

No significant obligations were identified after reviewing financial lease agreements for the real estate that the Company has with private entities and government organization involving the location of certain of the Company's assets in those installations, such as switchboard equipment, radio stations, antennas and other equipment in relation to possible obligations at the end of the contract, considering their term and renewal conditions, In cases where the lease contracts were not renewed no significant withdrawal costs were incurred, Considering the above and the nature of the real estate lease agreements, the Company has established a provision for dismantling costs presented in other non-current provisions (Note 19b).

The Company has no assets provided in guarantee.

16. Other current and other non-current financial liabilities

The composition of other current and other non-current financial liabilities that accrue interest is as follows:

Concepts		09.30.2018		12.31.2017	
		Current ThCh$	Non-current ThCh$	Current ThCh$	Non-current ThCh$
Bank loans	(a)	81,596	98,542,717	93,320	91,615,282

18. Financial instruments, continued

1, Classification of financial instruments by nature and category, continued

The book value of the current portion of accounts payable to related entities and trade accounts receivable approximates their fair values, due to the short-term nature of their due dates.

Instruments recorded under other current and non-current financial liabilities classified as financial liabilities at fair value through profit or loss and hedge derivatives are presented at their fair value in the statement of financial position.

Financial instruments recorded under other current and non-current financial liabilities which correspond to interest bearing loans, are generally recorded for the cash received, net of costs incurred in the transaction, These obligations are valued at amortized cost, using the effective interest rate method, and mainly include bank loans and unguaranteed obligations (bonds), among other things (note 16).

18. **Financial instruments**, continued

2, Hedging instruments

As of September 30, 2018, hedge instruments are detailed as follows:

Type of hedge	Underlying	Net total as 09.30.2018	Up to 90 days	90 days to 1 year	Total current		To Maturity 1 to 3 years	3 to 5 years	Total non-current	
					Assets (note 6)	Liabilities (note 16)			Assets (note 6)	Liabilities (note 16)
		ThCh$	ThCh$	ThCh$	ThCh$	ThCh$	ThCh$	ThCh$	ThCh$	ThCh$
Exchange rate – cash flow hedge (1)	Supplier Debt	5,188,720	1,795,334	3,393,386	5,433,014	(244,294)	-	-	-	-

Interest rate – cash flows hedge (4)	Financial Debt	(8,172,822)	(3,709,725)	9,532	666,810	(4,367,003)	-	(4,472,629)	4,111,800	(8,584,429)
Exchange rate and interest rate – fair value hedge (5)	Financial Debt	93,406,830	-	-	-	-	-	93,406,830	99,112,436	(5,705,606)
	Total	**82,585,997**	**(5,360,681)**	**(987,523)**	**690,553**	**(7,038,757)**	**-**	**88,934,201**	**103,224,236**	**(14,290,035)**

Hedge instruments have generated an effect on result of ThCh$ (44,800,934), As of December 31, 2017 the accumulated effect on equity is ThCh$ 5,172,662 (see note 22d),

Description of hedge instruments:

1. Exchange rate – cash flow hedge: This category includes derivative instruments used to hedge highly probable trade debt future cash flows,
2. Exchange rate – fair value hedge: This category includes derivative instruments entered into to hedge existing commercial debt,
3. Interest rate hedging – fair value: This category includes, derivative instruments entered into to hedge valuation of debt instruments at a variable interest rate,
4. Interest rate – cash flows hedge: This category includes, derivative instruments entered into to hedge debt instrument interest rate risk, whose interest cash flows payable are denominated at a variable interest rate,
5. Exchange rate and interest rate – fair value hedge: This category includes derivative instruments entered into to hedge foreign currency risk on debt instrument capital,

18. Financial instruments, continued

3, Valuation of hedging instruments

The Company has financial derivative valuation models that use local and international financial market interest rate curves, to determine cash flows associated to each derivative and to discount those cash flows to present value, once this valuation is obtained, it is compared to the valuation certificates provided to us by the banks, Should there be material differences, a review of the internal model is carried out and it is verified if the bank is making a correct valuation".

The main assumptions used in the valuation models of derivative instruments are as follows:

a) Market assumptions such as spot prices and other price projections, credit risk (own and counterparty) and rates, using observable market information and through techniques commonly used among its participants.

b) Discount rates like risk free rates and counterparty rates (based on risk profiles and information available in the market).

c) In addition variables are incorporated to the model such as: volatility, correlation, regression formulas and market spread.

The methodologies and assumptions used to determine the fair value of financial derivative instruments are applied consistently from one year to another, The Company considers that what has been previously described is used in a fair manner, since it is in line with those used by the market and result in a measurement of fair value that is appropriate for the purposes of measuring the financial statements and disclosures, It should be noted that these disclosures are complete and adequate.

4, Fair value hierarchy of financial instruments

Financial instruments recognized at fair value in the statement of financial position are classified according to the following hierarchies (note 18,1):

Level 1: Corresponds to methodologies of fair value measurement using market rates (without adjustments) in an active market considering the same assets and liabilities valued.

Level 2: Corresponds to methodologies of fair value measurement using data on market rates, not included in Level 1, that are observable for assets and liabilities valued, whether directly (that is, as a price) or indirectly (that is, derived from a price).

Level 3: Corresponds to methodologies of fair value measurement using valuation techniques that include information on assets and liabilities valued, which are not based on observable market information.

19. Other currents provisions

a) The balance of currents provisions is detailed as follows:

Concepts	09.30.2018 ThCh$	12.31.2017 ThCh$
Civil and regulatory	10,430,744	10,387,867
Total	**10,430,744**	**10,387,867**

Based on the progress of the proceedings, the Company's management considers that the provisions recorded in the financial statements adequately cover the litigation risks described in Note 27b, therefore they do not foresee that they will result in liabilities other than those recorde,

Due to the characteristics of the risks that cover these provisions, it is impossible to determine a reasonable payment date schedule,

As of September 30, 2018 and December 31, 2017 the movements in provisions is as follows:

Movements	09,30,2018 ThCh$	12,31,2017 ThCh$
Beginning balance	**10,387,867**	**11,036,140**
Increase in existing provisions	944,656	1,020,192

Actuarial (profits)/losses, net due to experience	50,810	(1,906,403)
Benefits paid	(4,305,999)	(1,758,260)
Others	185,904	1,838,481
Movement subtotal	**(2,345,610)**	**484,691**
Ending balance	**34,898,104**	**37,243,714**

20. Employee benefits accrual, continued

a) Post employment benefits, continued

Actuarial Hypotheses

The hypotheses used for the actuarial calculation of employee benefits obligations are reviewed once a year and correspond to detailed, to September 30, 2018 and December 31, 2017:

- **Discount rate:** An annual nominal rate of 5,02% and 5,196% are used as of September 30, 2018 and December 31, 2017 respectively, This rate must be representative of the time value of money, for which a risk-free rate is used represented by BCP (Central Bank of Chile Bonds issued in Chilean pesos) instruments, for a relevant term of close to 20 years.

- **Incremental Salary Rate:** An increase table is used according to the inflation projection established by the Central Bank of Chile, The rate used for the excercise ended September 30, 2018 and December 31, 2017 was 3%.

- **Mortality:** The RV 2014 mortality tables established by the Superintendency of Securities and Insurance are used to calculate social life insurance reserves in Chile.

- **Turnover rate:** Based on the historical Company data, the rotation used for both periods are as follows:

benefit group	rotation rate resignation	rotation rate dismissal
Compensation frozen	0,38%	2,53%
Compensation post-frozen	3,77%	5,37%
Quotas system	2,73%	2,73%
Decease	2,73%	2,73%

- **Years of service:** The Company assumes that the employees will remain until they are of legal retirement age, (women up to 60 years old and men up to 65 years old),

The model for calculating employee termination benefits has been prepared by an external qualified actuary, The model uses variables and market estimates in accordance with the methodology established by IAS 19 to determine this provision,

b) Sensitivity of assumptions

Based on the actuarial calculation as of September 30, 2018, the sensitivity of the main assumptions has been reviewed, determining the following possible effects on equity:

Description	Base	Plus 1% ThCh$	Less 1% ThCh$
Discount rate	5,02%	(2,161,200)	2,414,534

20. Employee benefits accrual, continued

c) Expected cash flows

In accordance with the employee benefits obligation, future cash flows for the following periods are detailed as follows:

Description	1st year ThCh$
Future payment cash flows	4,596,997

Reserve for financial assets available for sale (viii)	1,493,734	(1,572,272)	(78,538)
Total	**(453,146,171)**	**(6,993,349)**	**(460,139,520)**

i) Capital revaluation

In accordance with Law No, 18,046, second paragraph of Article 10 and in accordance with Official Circular No, 456 issued by the Superintendency of Securities and Insurance, the revaluation of the Company's capital as of December 31, 2008, must be presented in this account,

ii) Business combination reserve

Corresponds to company reorganizations performed in previous years,

iii) Other miscellaneous reserves

Contains the difference between the valuation of the investments that Telefónica Móviles S,A, has in the consolidated subsidiaries and the capital of each one of these, This effect is in the amount of ThCh$53,430,874.

In September 2017 and in reference to the withdrawal of 1,072,813 minority shareholders described in the treasury shares reserves (v) point, Telefónica Móviles Chile S,A, increased its interest in subsidiary Telefónica Chile S,A, from 97,92% to 99,0281653%, which generated an increase of ThCh$ 1,083,569 in the aforementioned effect.

During 2014, the Company made a capital increase paid by Telefónica Internacional Holding S,A, with the contribution in dominion of a group of assets and liabilities, This transaction generated a difference between the carrying amount of those assets and liabilities and the contribution value of ThCh$61,567,621 (83,297 thousand euros) that were recognized in this heading, since it corresponds to a corporate reorganization.

In July 2010, the Company purchased the investment of Dutch company Telefónica Chile Holding B,V, in Telefónica Internacional S,A, This transaction generated a 20% withholding tax that was assessed by the Chilean Internal Revenue Service in 2013 and which had to be paid by the Company since it is jointly and severally liable, This tax in the amount of ThCh$3,722,259 (5,036 thousand euros) was recognized as other reserves.

22. Equity, continued

d) Other reserves, continued

iii) Other miscellaneous reserves, continued

In addition, it is composed of the accumulated revaluation reserve and of the adjustment for first-time adoption of International Financial Reporting Standards (IFRS) assumed by subsidiary Telefónica Móviles Soluciones y Aplicaciones S,A, in the amount of ThCh$2,365,462, And others negative concepts for ThCh$ 70,619.

iv) Employee benefits reserve

Corresponds to the effect arising from changes in the actuarial hypotheses for the employee benefits provision, originated in subsidiaries Telefónica Chile Servicios Corporativos Ltda, and Telefónica Investigación y Desarrollo Chile SpA.

v) Treasury shares reserves

As of June 30, 2017 there was a capital decrease in subsidiary Telefónica Chile S,A, as a consequence of the right to withdraw exercised through the agreements adopted at the Extraordinary Shareholders' Meeting held on March 30, 2016, Consequently, the accumulated treasury shares reserves as of December 31, 2016 were settled in the amount of ThCh$ 7,406,043.

As of September 30, 2017 in subsidiary Telefónica Chile S,A, 1,072,813 of Shareholders' decided to take retirement product of elimination of series A and B, as a consequence the subsidiary disburse the amount of ThCh$ 762,524, wich are registered in equity pending of Company resolution, whose term expires in August 2018, Due to the above, Telefónica Móviles Chile S,A, recognized the corresponding ThCh$ 755,114 in its controlled shareholders' equity.

As of September 30, 2017, subsidiary Telefónica Chile S,A, agreed to eliminate Series A and Series B shares, therefore the subsidiary had to disburse ThCh$762,640 to the shareholders that decided to withdraw, Due to the above, Telefónica Móviles Chile S,A, recognized the amount of ThCh$ 755,114 in its controlled equity.

As a consequence of exercising this right and the fact that the subsidiary did not dispose of the shares acquired within a period of one year from their acquisition, on August 31, 2018, it decreased its capital, therefore Telefónica Móviles Chile S,A, recognized the effect in its controlled equity as of September 30, 2018.

vi) Foreign currency translation difference reserve

Corresponds to the differences generated by the conversion of the Company's financial statements.

vii) Hedge reserve

Transactions designated as expected transaction cash flow hedges are probable, and where the Company can execute the transaction, the Company has a positive intention and ability to consummate the expected transaction, Expected transactions designated in our cash flow hedges are maintained as probably occurring on the same date and amount as originally designated, otherwise the ineffectiveness shall be measured and recorded when appropriate, In addition, the effects of fair value associated with rate insurance are included.

22. Equity, continued

d) Other reserves, continued

viii) Reserves for financial assets available for sale

Corresponds to the effect of market valuation of the investment of subsidiary Telefónica Chile S,A, in Telefónica Brasil.

e) Non-controlling interest

Total	**706,568**	**571,610**	**206,960**	**278,274**

25. Leases

Leases which substantially transfer all risks and benefits inherent to ownership are classified as financial leases all other leases are classified as operating leases.

Financial leases where the Company acts as lessee are recognized at the beginning of the contract, recording an asset based on its nature and a liability for the same amount, for the fair value amount of the leased asset or at the present value of minimum lease payments, Subsequently, minimum lease payments are divided between the finance cost and reduction of the debt.

The finance cost is recognized as an expense and is distributed over the years that constitute the term of the lease, in order to obtain a constant interest rate for each year on the balance of the debt pending amortization, The asset is depreciated under the same terms as the rest of similar depreciable assets, if there is reasonable certainty that the lessee will acquire ownership of the asset at the end of the lease, If such certainty does not exist, the asset is depreciated over the useful life of the asset or the term of the lease, whichever is less.

The main operating lease contracts are associated directly to the line of business, such as leases for commercial office real estate and telecommunications technical facilities space, Operating lease expenses accrued are presented under other expenses by nature, in the statement of income.

The Company has operating lease contracts that contain various clauses referred to dates and terms of renewal and readjustments, Should a decision be made for early termination of a contract, the payments stipulated in those clauses must be made.

Concepts	07.01.18 to 09.30.18 ThCh$	09.30.2018 ThCh$	07.01.17 to 09.30.17 ThCh$	09.30.2017 ThCh$

27. Contingencies and restrictions

In the normal development of its line of business, Telefónica Chile S,A, is part of certain proceedings, involving civil, labor, special and penal matters for different concepts and amounts, In general, management and its legal counsel, both internal and external periodically monitor the evolution of those lawsuits and contingencies affecting Telefónica Chile S,A, in the normal course of its operations, analyzing in each case the possible effect on the financial statements,Taking into consideration the legal and de facto arguments exposed in those proceedings, especially those in which the Company is the defendant party, and historical results obtained by Telefónica Chile S,A, in proceedings with similar characteristics in the opinion of the legal advisors, the risk that it will be condemned to pay the amounts claimed in the mentioned lawsuits is remote.

Notwithstanding there are certain proceedings in which due to the aforementioned considerations it is believed that there is a risk of loss that is rated as probable, which has motivated the establishment of provisions for the amount of what would be the estimated loss as of September 30, 2018, which altogether amounts to ThCh$9,687,937 in the parent and the amount to ThCh$742,807 in the subsidiaries, Regarding this figure, it is estimated that Telefónica Móviles Chile S,A, will have to pay the amount of ThCh$219,278 and the subsidiaries the amount of ThCh$520,470 before December 31, 2018 and the rest before culminate first quarter of 2019.

On the other hand, there are several proceedings for which the estimated risk of loss is qualified as possible, for a total amount of ThCh$ 1,257,234 in the parent and the amount of ThCh$ 12,201,422 in the subsidiaries,

In addition to the above, the following proceedings should be especially mentioned:

a) Voissnet proceeding

On March 31, 2016, the 4th Civil Court of Santiago dictated final sentence in the judicial proceeding called “Voissnet S,A, vs Telefónica Chile S,A,”, Rol No, 26,086-2014, completely rejecting the lawsuit, On June 19, 2018, the Court of Appeals of Santiago, aware of the writ of appeal filed by the plaintiff, revoked that sentence and condemned subsidiary Telefónica Chile S,A, to pay the amount of Ch$5,526,164,936, Subsidiary Telefónica Chile S,A, filed an appeal for dismissal in form and substance before the Supreme Court, whose foundation make its legal advisors believe that the sentence will be set aside by the Supreme Court.

b) Tax contingecy

i. On August 29, 2014 through Notification No, 383-14/G4, the Chilean Internal Revenue Service notified tax assessment No, 42, to Telefónica Larga Distancia S,A, subsidiary of Telefónica Chile S,A, as of the date, in which it determined differences in the first category (corporate) tax for the 2011 tax year, which resulted in rejection of items in the amount of ThCh$ 18,967,328, equivalent to a tax contingency of ThCh$ 5,538,774, which resulted from the review of the Company's tax loss carry forward, On December 18, 2014, a complaint was filed before the 3rd Tax and Customs Court of Santiago, case RUC/RIT 15-9-0000055-0/GR-17-00279-2014, which is currently awaiting the reception to the evidence stage.

   On April 30, 2016 Telefónica Larga Distancia S,A, merged by incorporation in Telefónica Chile S,A,, with the latter absorbing the former, acquiring all its assets and liabilities and succeeding it in all its rights and obligations.

27. Contingencies and restrictions, continued

b) Tax contingency, continued

ii. On December 29, 2015 through Notification No, 1534, the Internal Revenue Service notified Tax Assessment No, 294 to Inversiones Telefónica Móviles Holding S,A, (currently Telefónica Móviles Chile S,A,), in which it determined a First Category Income Tax difference for FY 2013, associated to surplus credit granted to shareholders in respect to a remittance of dividends abroad, The amount of the contingency has been valued at ThCh$ 15,811,445 including taxes and legal surcharges, During 2016 a complaint was filed before the 3rd Tax and Customs Court of Santiago, case RUC/RIT 16-9-0000307-6/GR-17-00070-2016, which is pending reception to the evidence stage.

iii. As part of a process of reviewing the taxable income of subsidiary Telefónica Móviles Soluciones y Aplicaciones S,A,, on June 17, 2016, the Internal Revenue Service issued the recalculation corresponding to FY 2012, This recalculation led to differences in the non-deductible expenses of article 21 of the Income Tax Law, The amount of the contingency to date has been valued at ThCh$ 751,676, figure that includes taxes and legal surcharges.

b) Miscellaneous lawsuits:

In the judicial proceeding entitled “OPS Ingeniería Limitada vs Telefónica Móviles Chile S,A,”, complaint filed before the 22nd Civil Court of Santiago, Rol C No, 20,891-2013, dated January 17, 2017, the Court of Appeals of Santiago dictated final sentencing in Civil Record No, 8249-2015, rejecting the appeal filed by Telefónica Móviles Chile S,A, and the appeal filed by the plaintiff OPS against the first instance final sentence, and partially accepting the appeal filed by Telefónica, In accordance with the above, that Court reduced the amount of the judgment from UF 510,011,92 to UF357,590,52, Both parties filed appeals for dismissal on this sentence, which were registered with the Supreme Court under Case No, 18,171-2017, and are ready to be heard.

c) Financial restrictions:

As of September 30, 2018 the Company has no financial restrictions,

TCH: Telefónica Chile S,A,
TEM: Telefónica Empresas Chile S,A,

e) Insurance:

The Company has insurance covering property all risk and loss of revenue due to service interruption, among others, on all its facilities.

28. Environment

Due to the nature of its line of business, the activities it develops and the technology associated to its management, the Company has not been affected by legal or regulatory provisions obligating it to make investments or material disbursements referring to protection of the environment during this year, whether in a direct or indirect manner.

Law No, 20,599 was published on June 11, 2012 regulating the installation of telecommunications services emitting and transmitting antennas.

Law No, 20,599 was published on September 11, 2012 regulating the installation of telecommunications services emitting and transmitting antennas, The provisions adopted include: i) restrictions and new regulations for the installation of new sites based on the height of the tower, its location and its closeness to sensitive entities and to other previously installed towers, New and stricter approval conditions are imposed for these new sites; ii) there is retroactive regulation of the height of towers installed before the law was enacted, which are close to the sensitive places determined by the Telecommunications Undersecretary (schools, hospitals, playschools, preschool, old age homes and others); and iii) also in a retroactive manner, there is regulation of tower concentration in denominated Saturated Zones, for which solutions contemplated are based on reducing the number of structures or else, compensation is established with work to improve the community, which must be agreed upon by the Neighborhood Groups and the Municipal Council, for 20% of the total cost of the tower, should some type of camouflage be used in the structure and 50% in cases where no camouflage is used.

28. Environment, continued

In compliance with this law, there are site dismantling activities or reduction of the height of existing structures, which implies responsible handling of the waste produced, For this purpose, we have a current contract with companies responsible for recycling, and have the certificates of recycling and final disposal of project residues.

The Company bases itself on what is required in the environmental assessment in reference to levels of emission of associated electromagnetic waves and also in the urbanistic and environmental area.

In this respect, the Company is currently working on implementing the tender projects indicated by Subtel where there are polygons placed in protection areas referred to in Law No, 19,300, In these cases, Environmental Impact Studies are carried out when projecting the installation of infrastructure in these protection areas to submit them to evaluation by the authority.

Approximately three years since the law that regulates the installation of towers came into effect, there have been instances of review of the manner in which this law has been implemented, In this manner, there are current projects to modify the Law so that the installation of transmission and broadcasting antennas for telecommunication services has to be submitted to the Environmental Impact Evaluation System, therefore the ongoing future execution of these studies is something to be taken into consideration.

Due to the obligations associated to the award for LTE on the 700 Mhz band, the Company must implement new cellular sites in isolated zones predefined by the authority, Due to the location of these sites various previous studies must be undertaken to validate the feasibility of construction, In this respect the Company has detected the need to prepare Declarations of Environmental Impact in 11 of these sites, 7 archeological studies, 19 Project Pertinence Letters and approximately 34 Forestry Handling Plans, All these prior studies have costs that are additional to the habitual projects and could imply work that goes beyond what is necessary to implement a cellular site.

In order to comply with Supreme Decree 148, issued by the Ministry of Health, which approves the Health Regulation on Dangerous Waste (RESPEL), and establishes the minimum health and safety conditions which are applicable to the generation, holding, storage, transportation, treatment, reuse, recycling, final disposal and other forms of elimination of this waste, A Dangerous Waste Warehouse was implemented for temporary storage of waste identified as dangerous, resulting from activities involving implementation and operation of the fixed technical sites of Telefónica, in which the Company foresees the reception of dangerous waste from all its locations in the Metropolitan Region, in order to then have it removed to a final certified disposal site.

The regime established by Law No, 20,920 Framework for Waste Management, the Extended Responsibility of the Producer and Encouragement of Recycling, places special attention on the wording of the Regulations that are in the process of being dictated and which will implement its content, especially the regime of extended producer responsibility (which is applicable only to a group of priority products), as well as the control procedures for cross-border movement of dangerous and non-dangerous waste.

As of May 29, 2018, the company has ISO 14001:2015 International Certification in conformity with the implementation of an Environmental Management System for Telefonica Chile, This certification is full scope, which provides the Company with coverage from the design stage to deployment and maintenance of the mobile network, plus marketing of Telecommunication Services and right up to our end customers.

28. Environment, continued

For the purpose of evaluating the impact that this regulation might have on the current operations of Telefónica Chile and, particularly, regarding its waste management, we have seen drafts of the contracts and tender documents existing to date.

The Company is in the process of evaluating each phase contemplated by Law to identify and quantify its impact, As of September 30, 2018 the Company's expenditures in relation to the implementation of the corresponding phases are not significant.

29. Risk management (Not audited)

a) Characterization of the market and competition

The Company faces strong competition in all its business areas and believes that this high level of competitiveness will be maintained, In order to confront this situation, the Company permanently adapts its business strategies and products, seeking to satisfy the demands of its current and potential customers, innovating and developing excellence in its attention.

The mobile telephone market is comprised of ten operators, of which four have their own network and the rest correspond to virtual mobile operators.

Operators with their own network are: Telefónica Móviles Chile S,A, (Movistar), owned by the Telefónica Group; Entel S,A,, owned by the Almendral Group; Claro, belonging to the América Móvil Group and WOM (formerly Nextel which in March 2015 was sold to the English group Novator Partners LLP who began operating in July 2015 under a new fantasy name and absorbing customers and infrastructure).

There are seven Virtual Mobile Operators, In 2012 Virgin Mobile, Netline (GTEL) and GTD Móvil entered the market, During 2013 Móvil Falabella and Telestar (which owns the Colo-Colo and Wanderers franchises) entered it, At the end of 2013, VTR signed a contract with Movistar to provide roaming services, In April 2015, VMO began commercial operations and lastly, in May of 2017, WOM signed a contract with Movistar to provide roaming services.

Mobile Voice

At the end of the third quarter of 2018, it is estimated that the mobile telephone market will have close to 27,1 million accesses, growing 4,3% in comparison to the same period the year before, With this, mobile telephone penetration per 100 inhabitants would reach 146,3%, increase 4,65 percentage points in a year.

Prepayment customers present a decrease in the industry, influenced by less dynamism in the economy, the effect of lower access charges and the commercial strategy of the companies to migrate these customers to postpaid plans, When comparing the third quarter of 2017 and 2018, prepay customers decreased by 508 thousand customers, whereas customers with contracts grew by 1,619 thousand customers, The proportion of prepayment closed at 61% of total customers in the market, -4,56 percentage points in comparison to as of September 2017.

29. Risk management (not audited), continued

a) Characterization of the market and competition, continued

Mobile Internet

Mobile Internet access experienced a high level of growth thanks to the higher penetration of smartphones with 3G and 4G technology, which allow better Internet navigation in the device, It is estimated that the number of units connected to Mobile Internet will reach 17,2 million as of September 2018, growing 25,0% in respect to the third quarter of 2017, With the above, market penetration per inhabitant is 92,8%, increasing 17,7 percentage points in a year.

b) Competition Risk

The mobile voice business is at a maturing stage, but without decreasing its dynamism due to the effects of portability and the entry of new players, This has caused operators to intensify the competition and improve their offers in order to maintain customers and capture new ones that are being incorporated to the market.

There were more than 880,000 mobile porting instances, Mobile portability has accumulated 14,6 million ported from when it began to September 2018, which is equivalent to 54,2% of total voice customers in the industry.

c) Regulatory Environment

Regulation plays a relevant role in the telecommunications industry, Stable standards and criteria allow adequate evaluation of growing projects and reduce the risk level of investments, The correct setting of tariffs, in turn allows the creation of a competitive and healthy environment.

It is in the interest of both the companies and the authorities, for delivery of services to increase and the digital breach to decrease in Chile, For this, in addition to correct tariffs, it is necessary for the associated regulations to be adequate and permit speedy resolution of the conflicts that necessarily arise between companies.

i) Tariff system for mobile telephones:

In accordance with Law No, 18,168 (General Telecommunications Law), the prices of public telecommunication services and of intermediate services contracted between the different companies, entities or persons that intervene in providing them, will be freely established by the suppliers of the respective service, notwithstanding the agreements that could be arrived at between them and the users.

Notwithstanding, the mentioned Law establishes the following three exceptions at the beginning of the mentioned price freedom:

In the case of public telephone, local and international long distance services, excluding mobile telephone services, and of switchboard and/or transmission of signal services provided, whether as an intermediate service, or as private circuits, if there was an express qualification by the Tribunal for the Defense of Free Competition (TDLC) in respect to the conditions existing in the market not being sufficient to guarantee a regimen of freedom of tariffs.

29. Risk management (not audited), continued

c) Regulatory Environment, continued

i) Tariff system for mobile telephones, continued

In the case of services provided though interconnections, the interconnection of public and intermediate telecommunications services is mandatory for telecommunications operators.

In the case of facilities that, in accordance with the mentioned Law, telephone companies must provide to carriers, In all the previous cases, the tariffs for those services are established as maximums by the Ministries of Transportation and Telecommunications and of Economy, Development and Tourism (hereinafter, "the Ministries") every five years, on the basis of a model for a theoretic efficient company.

Even though mobile traffic tariffs are free and are established by the market, interconnection tariffs must be established by the Ministries, It is thus that in Chile since 1999, for mobile telephone companies the "CPP" (Calling Party Pays, i,e, whoever makes the call is responsible for paying it all) system has been applied, whose tariff is determined through the dictation and publication of a decree from the Ministries of Transportation and Telecommunications and of Economy, Development and Tourism, every 5 years, which establishes the maximum interconnection rates that each company can charge for calls ending in their network.

The tariffs that will be in place for Telefónica Móviles Chile S,A,, for the 2014 – 2019 period were established through the publication of Decree No, 21, 2014, issued by the Ministries of Transportation and Telecommunications and of Economy, Development and Tourism in the Official Gazette on June 4, 2014, In accordance with the trajectory of the Price Cap established in this decree, in January 2016 a rate reduction of 18,7% was applied, and in January 2017 a last reduction of 23% was applied.

At the end of 2017, Subtel began a new mobile tariff setting process for the 5-year period from 2019 to 2024,

The concessionaires subject to tariff regulation presented their study on July 29, 2018, The new tariff decree comes into force on January 26, 2019.

ii) Tariff system for fixed telephone services:

The process of establishing new prices for Telefónica Chile S,A, for the 2014 - 2019 periods began at the end of 2013, in conformity with the procedure regulated by law.

Decree No, 77, issued on May 5, 2014 by the Ministries of Transportation and Telecommunications and of Economy, Development and Tourism was published in the Official Gazette on February 23, 2015, and establishes for Telefónica Chile S,A,, the tariff levels for charges in the Local Tranche and other services associated to Public Telephone Services provided to the end user, the tariffs applied to the Concessionary under the ministry of Articles 24 bis and 25 of the law (mainly access charges) and tariff indexation mechanisms, The decree was published once the "Contraloría General de la República" performed its review of the mentioned decree and it began to be in force since May 8, 2014, The difference in the amount charged had to be retroactively settled.

During this year Subtel has begun the new tariff process corresponding to the 2019-2024 five-year period, dictating the Final Technical Documents on June 11, 2018, Telefónica Chile must present its new tariff study on November 9, 2018, The new regulated tariffs that arise from this tariff process will begin to be in force as of May 2019.

29. Risk management (not audited), continued

c) Regulatory Environment, continued

jj) Tariff system for fixed telephone services:

Through decrees from the Ministries of Transportation and Telecommunications and of Economy Development and Tourism, on January 24, 2014 the maximum access charge rates were established for the 2014 -2019 period, for the use of mobile networks by all operators with networks and, in addition the hourly structure was modified, The new tariffs became effective as of January 25, 2014, for the 2014-2019 period.

The new tariff setting process for mobile companies, for the 2019-2024 five-year period is underway, On July 29, 2018 the companies subject to regulation presented their tariff study, The new regulated tariffs that arise from this tariff process will begin to be in force as of January 2019.

iii) Spectrum Allocation

There are two mechanisms for allocating frequencies in Chile: direct allocation and allocation through public tender.

The Company has telecommunications concessions that allow it to operate in the 700 MHz, 850 MHz, 1,900 MHz and 2,600 MHz, frequency bands, which are granted by the Ministry of Transportation and Telecommunications.

Through Decree No, 71, of 2015, published in the Official Gazette on September 14, 2015, Telefónica Móviles Chile S,A, was granted a Public Service Data Transmission concession, with the allocation of block A of the 713-748 MHz and 768 – 803 MHz frequency bands, This was carried out in accordance with the regulated procedure that governs public tenders for the allocation of concessions, As of that date there is a period of 18 months to provide the service in the 366 mandatory locations, 2 routes and 158 schools; and 24 months to implement the committed network on the 700 MHz band, Movistar complied with both deployment deadlines.

At the time, a Consumers' Association (Conadecus) filed a complaint before the TDLC against the companies that allocated the 700 spectrum, The TDLC rejected the complaint since it considered that Conadecus did not have active legitimization to file a lawsuit, The Supreme Court accepted the appeal filed by the organization of consumers, Conadecus, resolving that it has active legitimacy to act in the process of allocating frequencies and ordering the TDLC to make a pronouncement on the basis of the matter submitted to it, Through sentence dictated on September 15, 2016, that Tribunal rejected the basis of the complaint filed by Conadecus, therefore on September 28, that organization of consumers filed an appeal before the Supreme Court, which is the last instance for appeal and whose decision is pending.

In the meantime, on March 14, 2017, within the established deadline, Telefónica Móviles Chile S,A, began providing the services corresponding to the considerations established in the tender documents for the 700 MHz spectrum tender, Telefónica Móviles Chile S,A, on september 14, 2017, complied with the deployment of all the sites committed in the LTE Commercial Project.

29. Risk management (not audited), continued

c) Regulatory Environment, continued

iii) Spectrum Allocation, continued

On May 25, 2017, the Supreme Court dictated a resolution, in which it decrees, as a measure to provide additional evidence, the issuance of an expert's report regarding: i) minimum bands which technically allow the 4G technology services to be provided at a national level, and, (ii) the technical feasibility of providing 4G services with the bands currently allocated to the incumbents, analyzing the economic impact and the impact on efficiency, Likewise, it requested a report from Subtel regarding the allocation of frequency bands for mobile services and on the bands that allow 4G services to be offered.

Conadecus, Claro, Entel and Movistar, all filed appeals against that resolution which were rejected.

Subtel issued the report requested by to the Court, explaining Chile's situation in detail in terms of allocation and use of the assigned frequencies, The Supreme Court ordered the annulment of the measures to provide additional evidence of the expert report decreed on May 25, 2017, Finally, on June 25, 2018 the Court issued its ruling.

On June 25, 2018, the Supreme Court dictated a resolution by which it accepted the writ of appeal filed by the plaintiff against the sentence of the "Tribunal de Defensa de la Libre Competencia" (TDLC), dated September 15, 2016, which rejected the complaint, The resolution of the Supreme Court stated:

I.- That the defendants, Movistar, Claro and Entel have engaged in anti-competitive conduct by obtaining blocks in the 700 band public tender, without respecting the limit of 60 MHz imposed as the maximum that each incumbent can have in the advanced mobile communications services market, in violation of Article 3 of D,L, 211;

II.- That the defendants dispose of the same amount of radioelectric spectrum that was acquired in the tender for the 700 band, leaving the election of the band that will be disposed to them;

III.- Subtel will ensure timely and adequate compliance with what is ordered in the preceding subparagraphs, adopting the measures necessary to carry it out.

IV.- Should Subtel deem that a review of the maximum limit of radioelectric spectrum that each operator can have is necessary, it must begin a consultation process before the "Tribunal de Defensa de la Libre Competencia" (TDLC) for this purpose, Otherwise, it must begin the necessary procedures to adjust the limit established to the defined parameters of 60 MHz for each operator participating in the mentioned radioelectric spectrum.

V.- The resolution did not apply fines.

On July 10, 2018, the TDLC ordered the fulfillment ("cúmplase") of that sentence, On July 27, 2018, Conadecus filed a brief requesting incidental compliance with the sentence, petition that was provided on July 30, agreeing to it, with summons, Telefónica Móviles Chile S,A, was notified of the request for incidental compliance with the sentence and of it being provided, on September 13; within the deadline of the summons, it filed a brief opposing the exception of lack of opportunity in the execution (both Entel and Claro filed the same exception, and in addition lodged an impossibility to comply), For these exceptions, the TDLC granted a transfer to Conadecus.

29. Risk management (not audited), continued

c) Regulatory Environment, continued

iii) Spectrum Allocation, continued

The Company’s management is assessing the potential effects that these could have (see Note 30),

On the other hand, on June 21, 2018, Subtel published Exempt Resolution No, 1289 through which it ordered the suspension of operations in the 3400 - 3800 MHz band to all operators that are operating in that band, which includes Telefónica Chile which has 50 MHz to provide services of Aysen (XI) and Magallanes (XII) in the south of Chile, The main affected parties are Entel, who has 100 MHz, and Claro with 50 MHz, both throughout the country.

According to Subtel, since this is a key band for the future deployment of 5G, the State must carefully study the use of this band, in accordance with international use, and ensure efficient use of the spectrum.

Subtel mandates that: 1) operators that provide services in that band must suspend operations and request modification of the concession to transfer customers to 4G bands; 2) no new concessions or concessional modifications will be granted on the 3400 – 3800 band (see Note 30).

The Chamber of Deputies is still processing a bill whose object is to allow partial radioelectric spectrum transactions between operators, with a preliminary favorable ex ante report before the National Economic Prosecutor's Office (“Fiscalía Nacional Económica”).

On November 25, 2017, the National Congress approved and published in the Official Gazette the law that governs the guaranteed minimum speed for Internet access.

The new law mainly establishes that:

- A percentage of the average speed offered for the hours with greatest and least congestion must be guaranteed.
- Contracts with users must establish the average speeds and main technical characteristics of the service.
- Users must be provided with a system or application that measures speed, which will have legal presumed value for the purpose of resolving complaints.
- An independent technical organization will carry out service quality measurements.
- A company is required to be a Telecommunications Intermediary or Public Service concessionaire in order to be a provider of access to the Internet.

Subtel must dictate the regulation, which will come into effect 6 months after its publication.

29. Risk management (not audited), continued

c) Regulatory Environment, continued

iv) Number Portability

Mobile and Fixed Number Portability was enabled in accordance with the schedule established by Subtel, through Resolution No, 6,367 of 2011, Number portability for Internet voice services, rural telephones and mobile party pays began on March 16, 2013, Portability of complementary services began on October 13, 2014 as provided for in Exempt Resolution No, 1022, issued by Subtel on March 31, 2014.

Regarding geographic portability and intermodal portability, through Exempt Resolution No, 4,535, dated August 4, 2015, Subtel's timeline established that geographic portability must be enabled as of November 2, 2015; the adding of one digit to mobile telephone numbers was implemented without problems as of February 6, 2016 and intermodal portability satisfactorily implemented on September 5, 2016.

On the other hand, in conformity with article 31 of Decree No, 16, of 2011, issued by the Ministry of Transportation and Telecommunications, which establishes the tender procedure for designating the Number Portability Administration Center (OAP or "Organismo Administrador de la Portabilidad Numérica"), in compliance with the regulated procedure, the Portability Board awarded the new OAP position to Telcordia Technologies, Inc.

Subtel dictated a new standard that establishes that as of March 2017 all mobile handsets that are commercialized in Chile must support all frequency bands that are commercially in use within the national territory (700, 850, 900, AWS 1700, 1900 and 2600 MHz) for at least one of the different technologies (2G, 3G and 4G) deployed as of the date of such commercialization.

Handsets that do not allow use on all bands, for at least one technology will not be able to be commercialized,

In addition, only mobile handsets whose models comply with the homologation procedure and have been registered in the IMEI's single and centralized database will be enabled in the public network, except for those that are temporarily in the country operating in international roaming mode.

Through Exempt Resolution No, 1179/2017, Subtel delayed beginning the operation of EMEI's database and final labeling of handsets until September 23, 2017, The new system is already operating, thus complying with the new regulatory obligation within the period established for that purpose.

d) Technological changes

On December 1, Subtel published Exempt Resolution 2350 in the Official Gazette, In this Resolution it established that for a period of 120 days from the date of publication, the obligation of administrative registration of mobile equipment acquired abroad, or the registration of mobile handsets not registered in the IMEI single data base, will not be applicable.

After the end of the period of 120 days, the handsets that are not registered in the central database will be able to handle traffic for a maximum period of 30 consecutive days, after which time the customer must carry out the administrative registration of the handset if applicable, If this process if not carried out, the handset will not be able to register in the mobile networks.

On June 28, 2018, Subtel issued Exempt Resolution No, 1372 through which the deadline for resumption of the operation of the IMEI database is extended until November 10, 2018.

The telecommunications industry is a sector that is subject to quick and important technological progress and the introduction of new products and services, The industry's growth has been driven, to a great extent, by the need of customers to be connected through mobile devices, This translates into a demand for permanent investment to allow the Company to stay on the leading edge of technology, Subsidiaries Telefónica Chile S,A, and Telefónica Móviles Chile S,A, are constantly assessing the incorporation of new technologies to the business, taking into consideration both the costs and benefits.

e) Level of Chilean economic activity

Since the Company's operations are located in Chile, these are sensitive to and dependent on the country's level of economic activity, In periods of low economic growth, high unemployment rates and reduced internal demand, there has been a negative impact on the local and long distance telephone traffic, as well as on the level of customer default.

f) Financial risk management objectives and polices

The Company's main financial liabilities, in addition to derivatives, comprise bank loans and bond obligations, payables and other payables, The main purpose of those financial liabilities is to obtain financing for the Company's operations, The Company has trade receivables, cash and short-term deposits, which arise directly from its operations.

The Company also has investments held for sale and derivative transactions, The Company is exposed to market risk, credit risk and liquidity risk.

The Company's Management supervises that financial risks are identified, measured and managed in accordance with defined policies, All activities derived from risk management are carried out by specialist teams with adequate skills, experience and supervision, It is the Company's policy that there is no commercialization of derivatives for speculative purposes.

f) Financial risk management objectives and polices, continued

The policies for managing such risks, which are reviewed and ratified by the Board of Directors, are summarized below:

Market Risk

Market risk is the risk of fluctuation in the fair value of future cash flows of a financial instrument due to changes in market prices, Market prices comprise three types of risks: interest rate risk, exchange rate risk and other price risks, such as equity risk, Financial instruments affected by market risk include loans, deposits, investments held for sale and derivative financial instruments.

Interest rate risk

Interest rate risk is the risk of fluctuation in the fair value of future cash flows of a financial derivative due to changes in market interest rates, The Company's exposure to the risk of changes in market interest rates is mainly related to the Company's long-term debt obligations with variable interest rates.

The Company manages its interest rate risk maintaining a balanced portfolio of loans and debts at variable and fixed interest rates, The Company has interest rate swaps in which it agrees to interchange, at certain intervals, the difference between the amounts of fixed and variable interest rates, calculated in reference to a notional agreed upon capital amount, These swaps are designated to hedge underlying debt obligations.

The Company periodically determines the efficient exposure to short and long-term debt due to changes in interest rates, considering its own expectations regarding future evolution of rates, As of September 30, 2018 the Company had 59% of its current and non–current financial debt accruing interest at a fixed rate.

The Company believes it is reasonable to measure the risk associated to interest on the financial debt such as the sensitivity of the monthly financial accrual expense in case of a change of 25 basic points in the reference interest rate of the debt, which as of September 30, 2018 corresponds to the Nominal Average Chamber Rate (TCPN) ("Tasa Promedio de Cámara Nominal"), In this manner, an increase of 25 basic points in the monthly TCPN would mean an increase in the monthly financial accrual expense for 2018 of approximately ThCh$ 59,297, whereas a decrease in the TCPN would mean a reduction of ThCh$ 59,297 in the monthly financial accrual period for 2018.

Foreign currency risk

Foreign currency risk is the risk that the future fair values or cash flows of a financial instrument May fluctuate due to exchange rate, The Company's exposure to exchange variation risks is related mainly to obtaining short and long-term financial debt in foreign currency and to a lesser extent to its operating activities, The Company's policy is to negotiate derivative financial instruments to help minimize this risk.

29. Risk management (Not audited), continued

f) Financial risk management objectives and polices, continued

Credit risk

Credit risk is the risk that a counterpart May not fulfill its obligations under a financial instrument or customer contract, which leads to a financial loss, The Company is exposed to credit risk from its operating activities (mainly due to receivables and credit notes) and from its financial activities, including bank deposits, transactions in foreign currency and other financial instruments.

Credit risks related to customer loans is managed in accordance with the policies, procedures and controls established by the Company to manage customer credit risk, Customer credit quality is evaluated in an ongoing manner, Outstanding customer charges are supervised, The maximum exposure to credit risk as of the report presentation date is the value of each class of financial asset.

Credit risk related to balances with banks, financial instruments and negotiable values is managed by the Finance Management Department in conformity with the Company's policies, Surplus funds are only invested with an approved counterpart and within the credit limits assigned to each entity, Counterpart limits are reviewed annually, and can be updated during the year.

The limits are established to reduce counterpart risk concentration.

Liquidity risk

The Company monitors its risk of lack of funds using a recurrent liquidity planning tool, The Company's objective is to anticipate the financing needs and maintain an investment profile that allows it to cover its obligations.

Capital management

Capital includes shares and equity attributable to the equity of the parent less unearned income reserves.

The Company's main objective in respect to capital management is to ensure that it maintains a strong credit rating and prosperous capital ratios to support its businesses and maximize shareholder value, Return on equity (income/total average equity) as of September 30, 2018 amounts to 5,10%, a decrease of 65,07% in comparison to period 2017, where it reached 14,60%, The above is mainly due to a decrease in profits attributable to the owners in amount of MCh$ 155,037, This variance is mainly due to tax proceeds in the previous period, generated by taxable Goodwill, which arose due to the merger by absorption carried out in June 2017.

The Company manages its capital structure and makes adjustments to it, in response to changes in economic conditions.

There were no changes in the objectives, policies or processes during the years ended as of September 30, 2018 and 2017.

30. Subsequent events

a) The consolidated financial statements of Telefónica Móviles Chile S,A, and subsidiaries, for the period as of September 30, 2018, were approved and authorized for issuance at the Board of Directors Meeting held on October 29, 2018,

b) On October 3, the Undersecretary of Telecommunications (Subtel) carried out the following acts in relation to the cases mentioned in Note 29, c), iii):

i. Presented to the Court for the Defense of Free Competition (“TDLC” in Spanish) the consultation for review of spectrum capacity according to the indications of the resolution dictated by the Supreme Court on June 25, 2018.

In addition, Subtel has presented to the court a set of “complementary conditions” of a general scope applicable to all bands and another set of “special conditions” to be considered in future tenders for 5G.

ii. It modified the resolution and suspended the use of the 3,400-3,800 band, It is thus how through a new Complementary Exempt Resolution No, 1953, it modified the absolute suspension of the use of this band and freed part of this spectrum only for use in local wireless telephone service (not for mobile services), Of Entel’s 100 MHz, it liberated 50; of Claro’s 50 MHz, it liberated 30, the same as VTR and Telefónica in the south zone of the country, The use of the remaining unliberated spectrum continues to be suspended for any service.

In addition, it should be noted that the unfrozen fraction can only be used to provide mobile services, change that is necessary to provide 5G, but only once the future frequency tenders for the 3400-3800 MHz range have been firmly adjudicated.

c) In the period from October 1 to 29, 2018, there have been no other significant subsequent effects that affect these consolidated financial statements.
